"Why settle for accessories when you can have Shackcessories?"

Don't buy accessories just anywhere!

Only RadioShack offers high-quality Shackcessories—not to mention a bigger selection of accessories than ever before for computers, A/V gear and wireless phones—no matter where you originally bought them. And with our certified, friendly experts and 7200 stores and dealers nationwide, you can find the accessories you want and the answers you need, quickly and conveniently. So why drive further, pay more and risk getting the wrong thing? Get it right, and get it better, the first time...at your neighborhood RadioShack.

Computer Accessories

Keyboards and mice • CD-Rs and more • Printer cables • USB cables and hubs

Wireless Accessories

Car power adapters • FutureDial SnapSync™ software • Plantronics® and JABRA® headsets • Cables and more

A/V Accessories

A/V signal senders • Universal remotes • Modulators and more • Premium cables

RadioShack is your battery headquarters

Why drive all over town searching for a special battery?

When it comes to powering electronics, nobody beats RadioShack.

We can power virtually anything electronic,
no matter where you bought it:

- Phones of all kinds—cordless, cellular, wireless
- Watches • Calculators • Hearing aids
- RC cars • Video games and toys • PDAs • Organizers
- Digital and 35mm cameras • Camcorders
- Laptops and computers of every description
- FRS, business-band and Ham radios

Improve your audio/video system with our ShackcessoriesSM!

RadioShack has a big selection of must-have accessories plus
the latest in hot new technology to help you get more
from the equipment you already have.

We're your cable connection

Hook up with the best performance your gear can deliver:
choose RadioShack Premium Cables.

See pages 19-21

Do more with your TV than just watch

True-stereo RF modulator adds A/V
input jacks to a TV without them.

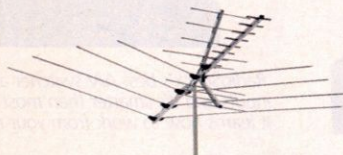

See page 9

Need more audio/video inputs? Add them
instantly—and select them by remote!

See page 10

Are you ready for HDTV? Our antennas are!

RadioShack Color Supreme Plus[®]
outdoor TV antennas are ready for
the future of TV.

See page 12

Revolutionary indoor TV antenna
rotates automatically for
the best reception.

We've got the Shackcessories to solve your home theater headaches!

Problem: My new DVD player doesn't connect to my TV.

Answer: RadioShack's RF modulators make the hookup fast and easy.

Many older TVs—even many new ones—lack audio/video input jacks to match the outputs of a DVD player. A RadioShack RF modulator instantly adds A/V jacks to a TV that lacks them. Plus, our newest RF modulator (shown) delivers sound in full stereo to a stereo-compatible TV. An RF modulator also lets you connect a camcorder, digital camera or video game to virtually any TV.

See next page

Problem: I'd like to watch programs from my DVD, VCR, cable or satellite box on a TV in another room, without running wires.

Answer: Get RadioShack's wireless TV signal sender.

Now there's no need to drill holes in walls or run wires under the carpet. RadioShack's new signal sender works through walls and floors—sends picture and sound to a TV up to 100 feet away. Hookup and operation are simple. Plus, it relays commands from your remote back to the equipment you're watching. The signal sender can also link a security camera or camcorder to a TV elsewhere in your home—makes it easy to set up a system to monitor a child's room or play area.

See next page

RadioShack's best A/V switcher adds six inputs and it's smarter than most others. It learns how to work from your remote.

Problem: I have to unplug and change connections when I want to switch from my DVD to my satellite box or camcorder.

Answer: RadioShack's audio/video switch boxes make cable-swapping a thing of the past.

As you add to your home entertainment or home theater system, you can quickly run out of input jacks for all your components. The easy solution is one of RadioShack's audio/video switch boxes. We offer low-cost manual switchers that add two, three or four inputs. And our intelligent remote-control switchers let you select components without leaving your chair! They actually learn the commands from your existing remote and perform the needed switching operations automatically.

See page 10

Add inputs to any TV with a RadioShack RF modulator.

Rear inputs

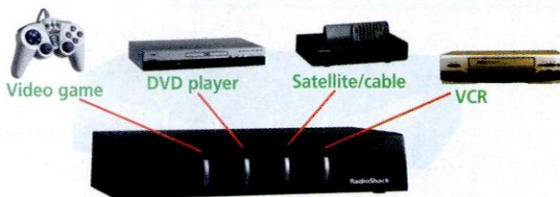

Front inputs

Mount vertically to save space

NEW True stereo RF modulator adds 2 switchable A/V inputs to any TV

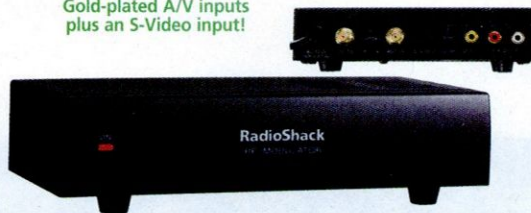

Perfect for a stereo TV without A/V inputs! (Works with mono TVs, too.) Connect the latest digital gear like DVD players and video game systems to a TV that lacks inputs. Enjoy true (left/right) stereo sound separation on stereo TVs. Both front and rear inputs include S-Video and 3 gold-plated RCA phono jacks for the best picture and sound. Choose horizontal or vertical mounting. #15-2525

Add 4 A/V inputs to a TV that has none!

RadioShack 4-way video RF modulator lets you hook up to 4 A/V devices to a TV that has no input jacks. Simply plug 4-way modulator into your TV's antenna jack and add up to 4 A/V devices. Press a button to choose what device you want. Input jacks include RCA composite video, stereo and S-Video. #15-1215

Gold-plated A/V inputs plus an S-Video input!

Instantly adds inputs to connect a DVD or video game to any TV

RF modulator lets you watch a DVD, VCR, video game or even a security camera on any TV. No inputs required—connects to the 75-ohm antenna terminal. Gold connectors for clear signal transfer. S-Video input for optimum picture quality on A/V source with S-Video connection. **ESS** #15-1214

UHF/cable channel modulator

Works with many older TVs without audio/video inputs to display a camcorder, DVD player, video games, security camera and more. Converts composite video and audio to any unused UHF or cable channel of your choice (UHF channels: 14-69, or cable channels: 60-94 & 100-125). #15-1243

Wireless signal senders and other solutions for home entertainment systems

Mount vertically to save space

Receiver

Sender

NEW Wireless 5.8GHz rear-channel amplifier sends crisp audio to your home theater rear surround speakers

Don't want tacky speaker wires running across your room? 5.8GHz

wireless rear-channel amplifier delivers sound to your two rear surround speakers—a clever finishing touch to a home theater system. Built-in 25-watt x 2-channel amplifier. Allows horizontal and vertical mount—great for tight spots. #15-1974

A/V outputs on receiver

A/V inputs on sender

NEW Wireless video signal sender makes "whole house" viewing easy!

2.4GHz deluxe A/V signal sender is like having a DVD player, cable box or satellite in every room! 100-foot range lets you transmit audio,

video and remote control commands from one TV or A/V device to another—even works through walls and floors. And you can easily move the wireless receiver to any room in the house that has a TV. Also extends your remote's reach. #15-2572

Control your cable box or satellite receiver from another room with your current remote

With the wireless remote extender, you can use your existing remote control to operate audio or video equipment from any room in the house, up to 100 feet away. It even works in situations where you can't easily place the receiver in front of equipment. Installs in minutes—just plug transmitter and receiver into AC outlets at desired locations. #15-1950

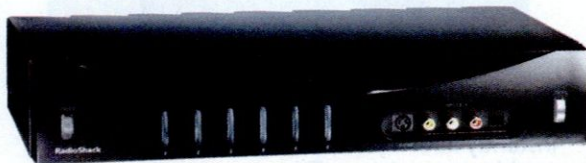

TVGuardian™ – Make movie time family time again

Foul-language filter monitors the closed-captioning text embedded in the video signal of TV shows and video movies. If an offensive word is detected, audio is muted or substituted. It references each word against a list of over 100 offensive words and phrases. It can be set to show you the silenced phrase in text form, but without the offensive words, so you don't miss a thing. Connects between your TV and DVD or VCR. #930-0636

Audio/video selectors.

Add convenience and more inputs to your TV

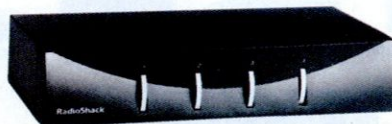

Deluxe 6-input/2-output audio/video selector automatically switches to the correct input when you power up a component by remote

No more getting up to change inputs! Use the "learning" function to teach it to switch to the correct input when you turn on a component with its own remote. Just turn on your DVD player to watch a movie and the selector switches to the DVD input. Switch on the cable to watch your favorite team and the selector switches to the cable input. It couldn't be easier. Learning function works with almost any remote control. Each of the 6 inputs and 2 outputs include an S-Video jack, optical digital audio jack, plus 3 RCA phono jacks. Built-in EPROM chip keeps a permanent memory of learned codes. LEDs indicate input source, learning function and on/off power. Two built-in converters, including analog audio-to-optical signal converter and composite-to-S-Video signal converter. **RSSP** #15-1987

4-input audio/video selector with remote "learning" function and S-Video jacks

With the learning function you can teach it to switch to the correct input when you power up a component by remote. Each of the 4 inputs and 2 outputs include an S-Video jack and 3 RCA phono jacks. Stores "learned" codes of most remotes in memory. LEDs indicate input source, learning function and on/off power. Includes built-in amplifier and composite-to-S-Video signal converter. **RSSP** #15-1977

4-input audio/video selector with S-Video jacks

No need to change cables. Just push a button to connect any one of up to four sources to your TV or VCR. Use it to switch between your satellite receiver, VCR, DVD player and camcorder. Switches video and audio signals. Works with stereo or mono audio. Has four inputs and one output, each with three RCA jacks and one S-Video jack. Converts composite to S-Video. **RSSP** #15-1976

Stereo A/V selector lets you switch between four sources

Just push a button to choose between any of four sources such as VCR, satellite receiver or DVD player. Direct desired signal to your VCR, TV or home theater system. Switches video and audio signals. Four video/stereo audio inputs, each with three RCA jacks. One video/stereo audio output with three RCA jacks. **RSSP** #15-1978

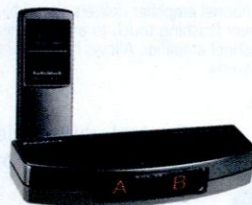

Audio/video 3-way selector

Great for copying or editing your favorite videos. Convenient front RCA input jacks for easy hookup of camcorders. Two sets of rear RCA input and output jacks for VCRs, DVDs or any other video sources. Edit button allows you to edit any two incoming A/V signals onto one video unit. **RSSP** #15-1587

2-input audio/video selector

Lets you switch your TV between any two sources such as a VCR, camcorder, DVD player or satellite receiver—no need to swap cables. Switches video and audio signals. Works with stereo or mono sound. Has 2 inputs and 1 output, each with 3 RCA jacks. #15-1952

Switch between 2 A/V devices by remote!

Remote-control A-B switch

Switch between two sources such as a VCR and a video game with the included remote or your universal remote. Two 75-ohm inputs, 1 output. Remote requires 2 "AA" batteries. **RSSP** #15-1968

Ready for high-definition TV? Our indoor TV antennas are!
Our antennas deliver a better picture on current broadcasts and in the future on HDTV.

Amplified HDTV and VHF/UHF antenna is ready for the future

Eliminates the need for separate antennas when you upgrade to HDTV. Adjustable fine-tuning and gain for best possible picture. Built-in A/B switch to select between antenna and another source, like video game or cable. Amplified for best reception, even with weaker signals. LED "on" indicator. 75-ohm coax cable with gold-plated connector. Includes 12VDC car power adapter and UL listed AC adapter. #15-1880

HDTV-ready amplified learning antenna automatically adjusts for the channel you select

Just program the antenna to fine-tune up to 50 stations. Then, anytime you select a channel with your remote, the antenna automatically adjusts for best reception. It even has manual controls if you can't find your remote. Built-in automatic switching function selects other source, like video game or cable, when antenna power is turned off. Adjustable gain control. Gold-plated 75-ohm output. 4-ft. 75-ohm coaxial cable with gold-plated connector. Includes AC adapter. **ESSP** #15-1870

Contemporary-design TV antenna

An attractive addition to any viewing room. Dial in the clearest possible picture for each station with the 12-position fine-tuning control. HDTV-ready. Internal UHF loop. Telescoping 39" black-chrome VHF dipoles. Gold-plated 75-ohm output. Includes 6-ft. 75-ohm coaxial cable with gold-plated connectors. #15-1868

Elegant HDTV-ready picture frame antenna

A unique and attractive way to improve your reception! Holds a 4x6" photo. 12-position fine-tuning. 3-foot 75-ohm cable. #15-1866

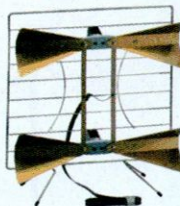

Gain switch and easy-to-adjust loop

Compact set-top antenna has selectable 15dB gain for weak stations, 8dB gain for strong ones. HDTV-ready. Fine-tuning control. LED "on" indicator. 3-ft. 75-ohm coax cable and UL listed AC adapter. #15-1838

Built-in A/B game switch

Compact set-top antenna has A/B switch so you can switch between TV, a video game or other video source. 75-ohm output. HDTV-ready. #15-1852

HDTV/UHF antenna

Outperforms built-in UHF antennas. Stands upright on top of TV set. Protective vinyl foot covers. 300-ohm hookup. #930-0998

Amplified FM with AM

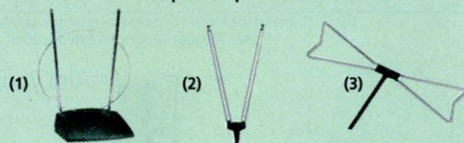

Compact and effective. Low-noise FM amplifier has gain control for best reception. Easily positioned for best AM. Includes UL listed AC adapter and matching transformer. #15-1832

Indoor FM antenna

Easy to install and provides excellent reception of FM radio stations in most listening locations. 75-ohm output. #15-1843

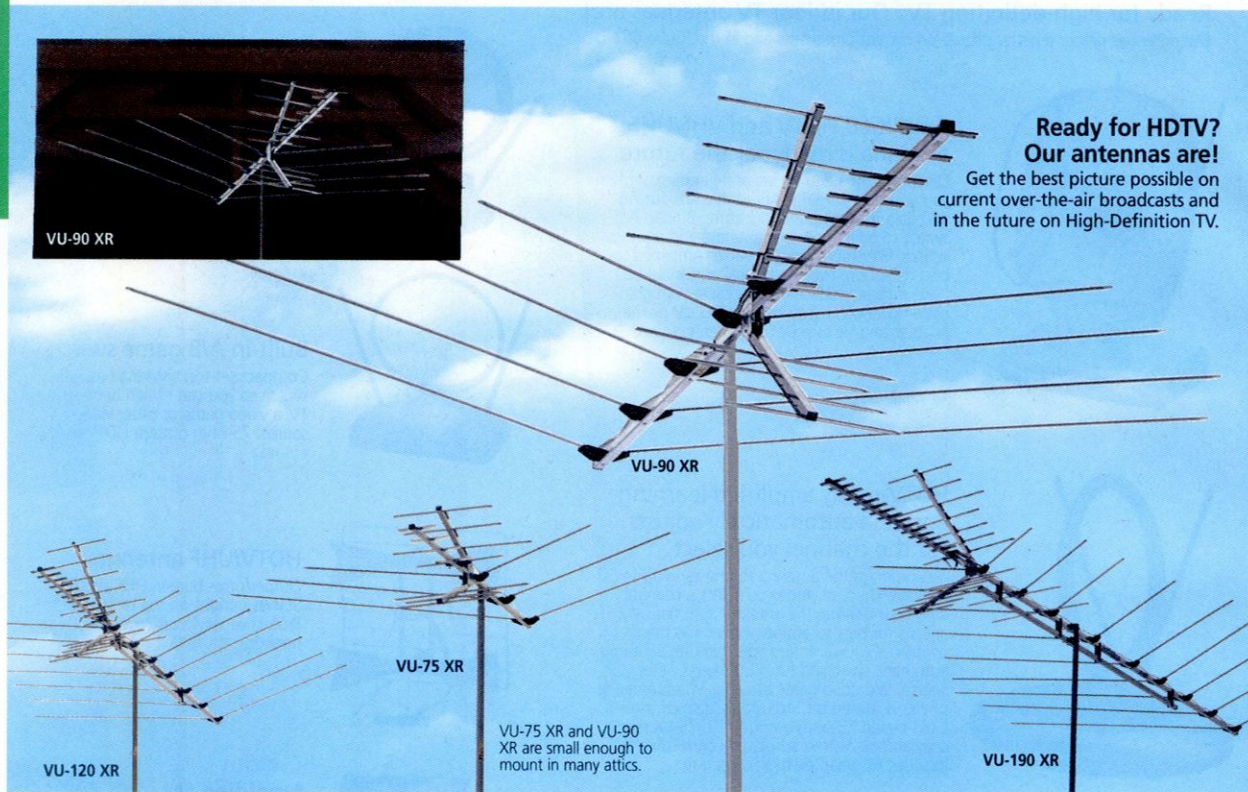

More reception problem solvers

(1) **VHF/UHF antenna.** Telescoping rods for VHF. Loop UHF. 75-ohm coax connector. #15-1864

(2) **VHF dipole.** Back-of-set snap-in VHF-TV antenna. 300-ohm hookup, 75-ohm transformer. #15-236

(3) **UHF outline bow-tie.** Super easy to install-snaps on VHF antenna rod. #15-234

Ready for HDTV? Our antennas are!

Get the best picture possible on current over-the-air broadcasts and in the future on High-Definition TV.

VU-75 XR and VU-90 XR are small enough to mount in many attics.

Select the model that's right for your location

Model No.	Range in Miles*			Suggested Use			Mount Type		Boom Length	No. of Elements	Catalog No.
	VHF	UHF	FM	City	Suburb	Rural	Roof	Attic			
VU-75 XR	75	50	50	✓	✓		✓	✓	50"	18	15-2151
VU-90 XR	90	70	70	✓	✓		✓	✓	80"	32	15-2152
VU-120 XR	120	90	90	✓	✓		✓		120"	37	15-2154
VU-190 XR	190	100	100		✓	✓	✓		160"	57	15-2156

*Estimated range, based on outdoor reception over flat and open terrain. Masts not included.
All outdoor antennas listed above are CEA certified.

Our antennas are built better to last longer

- High-tensile-strength aluminum for long life
- Snap-open elements for "instant" assembly
- Air-insulated multiple-drive system
- Heavy-duty, high-impact molded insulators
- UHF yagi and corner reflector combination
- Strong square boom with "no-tilt" clamp

The best parts, the best selection. Your nearby RadioShack carries a wide selection of quality masts and mounting hardware to meet your installation needs. Additional hardware and more antennas are available in-store and online at RadioShack.com.

Aim your antenna to get the best TV picture & FM reception

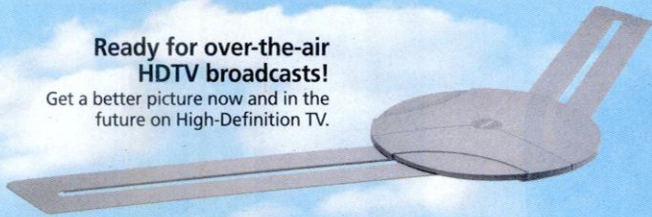

Rotator aims your antenna for the clearest signal from every station within range. An indicator on the control displays direction. Audiophiles: Also helps cut FM "multipath" for improved stereo in problem areas. Fits 1½" to 1¾" masts (extra). UL listed AC. Requires 3-conductor cable (#15-1150). #15-1245

100-ft. 3-conductor rotator cable (not shown). #15-1150

Wireless controller. Adds remote operation to RadioShack #15-1245 antenna rotator. Includes handheld remote and controller only (not shown). #930-0670

Ready for over-the-air HDTV broadcasts!

Get a better picture now and in the future on High-Definition TV.

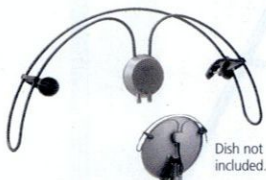

NEW Low-profile amplified TV/HDTV antenna mounts outside or indoors—use alone or with your satellite dish

HDTV-compatible TV antenna receives digital broadcast high-definition signals with crystal clarity. Ideal for city or suburban locations. Built-in 20dB amplifier. Designed for placement horizontally as high as possible. It also mounts in most attics. Weatherproof housing. Unidirectional design. #15-2185 Mast not included.

Note: #15-2185 is not recommended for indoor use in a home with aluminum siding, metal framing, or plaster walls with metal backing. For attic mounts, attic walls must not have metal foil-backed insulation.

Clip-on TV antennas for satellite dish

Dish not included.

TERK® TV-42 amplified local VHF/UHF TV antenna

Fast, easy no-tool installation—just clip to your 18" dish and connect to existing satellite lead-in cable(s). Omnidirectional, perfect for urban or suburban areas. Compatible with single or dual-LNB dishes. Comes with two indoor diplexers and all cables needed to connect to one or two satellite receivers. #15-2183

NEW TERK® TV-44 amplified local VHF/UHF TV antenna for multi-satellite dish setup

Why pay for local channels? Get them FREE! Just clip to your multi-dish setup and connect to existing satellite lead-in cable(s). Ideal for urban/suburban areas. Pulls in over-the-air HDTV broadcasts with crystal clarity. Fits 20" dish. #15-2190

Mobile TV antennas

Low-profile VHF/UHF omnidirectional amplified antenna

21"-diameter antenna for suburban/urban areas, RVs, trailers, boats. Built-in amp boosts signals 20dB. Includes AC adapter. Add DC adapter #273-1817/M for RV/marine use. #15-1634

Easy-to-mount dipole mobile TV antenna

Let your passengers enjoy broadcast TV programs while traveling. Installs on the rain gutter or window and removes in seconds. Efficient, loaded fiberglass elements. Comes ready to use with coax hook-up cable. VHF/UHF. #15-1609

FM-stereo antennas and UHF-only TV antenna

High-gain directional FM-stereo antenna

An excellent choice for rural areas and when desired stations are all in one direction. This six-element, triple-drive antenna picks up stations up to 110 miles* away. It's preassembled and has fold-out elements for easy installation in most attics or outdoors. #15-2163

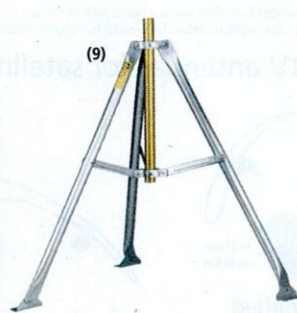

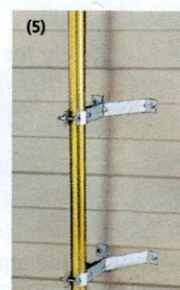

UHF-only TV antenna is HDTV-ready

Add to your existing VHF antenna to boost reception on UHF channels 14-69. Ideal for use when VHF and UHF stations are in different directions and for custom or fringe-area UHF installations. Preassembled. Fold-out elements for easy installation. 17 elements. 40" boom. Range up to 75 miles*.

#15-2160

*Estimated range, based on reception over flat and open terrain.

Mast mounts for roofs, vent pipes, chimneys, eaves, walls and attics

(1) Base and roof mount. Mast locks into exclusive-design U bolt. The swivel base fits the slope of virtually any roof. Made of heavy-gauge steel. #15-889

(2) Vent pipe mount. An alternative to chimney mounting for smaller antennas. Attach steel brackets to vent pipe, then clamp in mast. For 2" to 5" vents. #15-893

(3) Universal mast anchor mount. Great for attic mounting. Heavy-duty U bolt for easy swivel. For masts up to 1 1/4" in diameter. (Mast must be guyed for roof and window installations.) #15-888

(4) 12" wall mounts. Secures a mast 12" away from the side of a building. Allows mast to clear eaves or other obstruction. Made of galvanized steel. For masts up to 1 1/4" diameter. #15-885

(5) 8" wall mounts. Holds a mast 8" away from the side of a building. For masts up to 1 1/4" diameter. #15-886

(6) 4" wall mounts. Secures a mast 4" away from the side of a building. For masts up to 1 1/4" diameter. #15-883

(7) Eaves mount for hanging rafters or trim boards. An alternative to roof and chimney mounting. Fits most medium-pitch roofs. Accepts masts up to 1 1/4" diameter. Includes four lag bolts. #15-891

(8) Chimney ratchet mount. Provides secure mounting to chimney. Tightens with screwdriver. Includes two stainless steel straps, each 3/8" x 18 feet. Accepts antenna masts up to 1 1/4" diameter. #15-839

(9) Heavy-duty 3-foot tripod mount. Hinged design for easier antenna repair or replacement. Heavy-duty straps and wings for better stability. Sturdy "L" bracket supports mast. #15-517

(10) Universal mast attic mount. The easy way to set up an antenna that fits in your attic. Made of galvanized steel. #15-882

Heavy-duty antenna masts

Gray color matches most satellite systems and blends in well with most roofs. Sturdy construction, 16-gauge steel. 1 1/4" diameter.

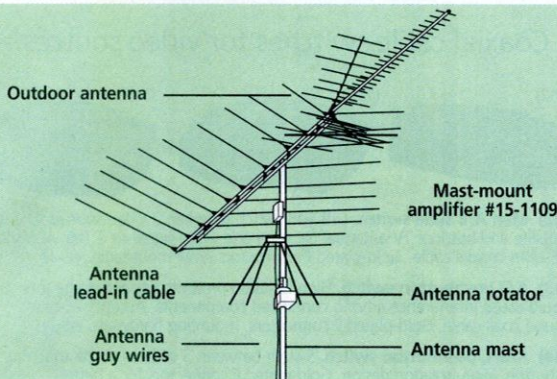

5-foot mast. #15-862 **10-foot mast.** #15-863

Telescoping antenna masts

Telescoping mast. Raises antenna for best possible TV and FM reception. Interlocking sections will not pull out, twist or shake. Corrosion-resistant galvanized steel. Clamp and guy wire ring provide firm support.

19-foot mast. Includes one 16-gauge, one 18-gauge section. #15-5065

Q&A

QUESTION:

When do I use an antenna-mounted TV/FM amplifier?

ANSWER:

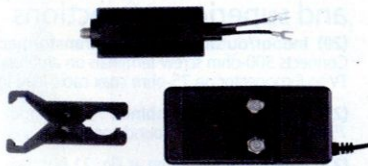

Antenna-mounted amplifiers are intended primarily for weak-signal "fringe" areas far from TV/FM stations. They're useful in moderate signal areas, too—if you have a long run (over 100 feet) of cable between the antenna and TV, or if you are using splitters to divide signals to drive several sets.

QUESTION:

When do I use an indoor TV/FM or cable amplifier?

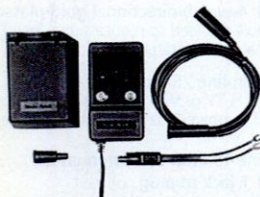

ANSWER:

Indoor amplifiers compensate for long runs of coax cable indoors and can distribute signals to several TVs. One of our indoor amplifiers (#15-1195) boosts all VHF/UHF-TV channels 2-69 and FM. Others are intended primarily to boost cable-TV or other VHF signals and distribute them to other rooms. Our 4-way A/V amp (#15-1172) distributes line-level audio/video signals.

Antenna-mounted signal amp

Delivers typical gain of 25dB on VHF-TV, 20dB on UHF. Has switchable FM trap to cut interference on TV from strong FM stations, and automatic short-circuit protection. Gain adjusts within a 10dB range to prevent overloading. **RSSP** #15-1108

High-gain antenna-mounted signal amplifier

Boosts VHF-TV (channels 2-13), UHF-TV (channels 14-69) and FM up to 30dB. Adjustable gain. Switchable FM trap helps cut FM interference. Includes hardware. **RSSP** #15-1109

Clearer Picture and Sound Made Easy

A properly installed outdoor antenna from RadioShack can provide greatly improved TV and FM reception. If an outdoor antenna is impractical, an indoor or attic-mounted antenna can provide better reception, although not as effectively as an outdoor model. If you own an outdoor antenna, check its condition—if it is damaged, corroded or more than 10 years old, you should replace it.

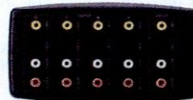

In weak-signal areas, antenna height is important. In general, the higher the antenna is mounted, the better it performs. Also, if the stations are in different directions, an antenna rotator will let you aim your antenna for best reception.

If you live in a "fringe" area far from the stations, a good outdoor antenna plus an antenna-mounted amplifier are the keys to great reception. In areas where TV and FM signals are so weak that even a large antenna, rotator and high-gain amplifier will not be effective, a satellite-TV system is a great alternative.

In-line signal amplifier

Minimizes signal loss caused by in-line devices or long cable runs (over 100 feet). Boosts signal by up to 10dB for CATV, satellite, VCR, TV antennas. Requires 75-ohm coax cable connection. **RSSP** #15-1170

4-way A/V distribution amp

Great for multi-VCR dubbing setups. Distributes signal from one A/V source, such as DVD, VCR or satellite, to up to four A/V outputs. Also converts composite video input to an S-Video output. Provides one S-Video input and four S-Video outputs. **RSSP** #15-1172

Bidirectional cable/TV amplifier for a single TV

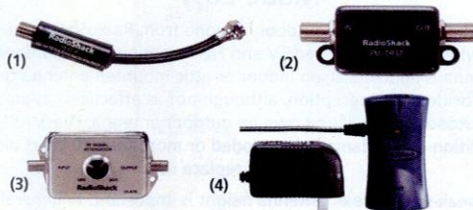

Amplifies incoming signal from a single cable input to one TV. Allows for bi-directional communication for cable modems, Pay-Per-View events and interactive TV. Designed to minimize interference. Red LED power indicator. Tabletop or wall mountable. #15-1195

Bidirectional CATV amplifier for two TVs. Same features as #15-1195 above, but with 2 TV outputs. **RSSP** #15-1196

Bidirectional CATV amplifier for up to 4 TVs. Same features as #15-1195 above, but with 4 TV outputs. **RSSP** #15-1197

TV/VCR problem solvers

(1) **RF interference filter.** Cuts CB/Ham interference. This 54-900MHz high-pass filter installs in-line at the 75-ohm input jack on TV or VCR. #15-579

(2) **FM trap.** Cuts "herringbone" interference on TV screen caused by strong FM signals. 75-ohm input and output. #15-577

(3) **TV/CATV attenuator.** Adjusts to reduce picture distortion caused by strong signals. Bidirectional—works with digital cable or Internet. 75-ohm input and output. #15-678

(4) **S-Video booster.** Amplifies S-Video signal to compensate for long cable runs of 50 feet or more. DC power supply is hard-wired to the amplifier. #15-1162

Splitters/combiners, matchers

(5) **VCR-to-TV combiner/splitter.** Connects TV with single 75-ohm input jack to a VCR or antenna that has separate 75-ohm VHF and 300-ohm UHF outputs. #15-1296

(6) **VCR-to-TV combiner/splitter.** Connects a VCR or antenna with single 75-ohm VHF/UHF output jack to an older TV that has separate screw terminals for VHF and UHF inputs. #15-1297

(7) **Hybrid splitter/combiner.** Splits 75-ohm coax cable to two 75-ohm outputs. #15-1141

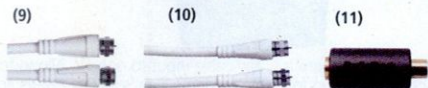

(8) **Matching transformer.** Connects 300-ohm antenna wire to 75-ohm input. #15-1253

REMEMBER:

300-ohm flat wire is used with screw terminals.
75-ohm round coax cable is used with F connectors.

Coax cable and adapters

Whether you're adding a VCR, hooking up a video game or wiring an entertainment system, we've got what you need to get connected.

(9) 25-ft. 75-ohm coax cable. F plug at each end. White. #15-1534,

(10) 4-ft. 75-ohm coax cable. F plug on each end. #15-1550

8-ft. 75-ohm coax cable. #15-1547

(11) **RCA to S-Video adapter.** Gold-plated RCA to S-Video. #15-1238

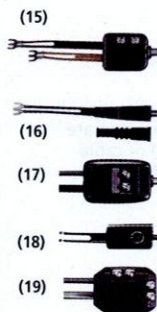

Coaxial cable switches for video sources

(12) **Mini A/B slide switch.** Lets you switch between 2 video sources, like a satellite and outdoor TV antenna. Or, send one video signal to 2 TVs. Accepts 75-ohm coaxial cable. Gold-plated F connectors. Wall mountable. #15-1216

(13) **A/B pushbutton switch.** High isolation prevents signal leakage that could cause interference among connected components. Accepts 75-ohm round coax cable. Gold-plated F connectors, mounting hardware. #15-1217

(14) **A/B/C pushbutton switch.** Switch between 3 sources at the touch of a button. High-isolation design. Gold-plated F connectors for a better connection. Includes optional mounting hardware. #15-1218

Signal splitters and transformers

(15) **Transformer/splitter.** 75-ohm input. Three 300-ohm outputs. #15-1139

(16) **Indoor/outdoor matching transformer.** Matches 300-ohm screw terminals on antenna to 75-ohm coax cable download. Reversible. #15-1140

(17) **Splitter with 75-ohm input.** One 75-ohm output for VHF. Two 300-ohm outputs for UHF-TV & FM. #15-1252

(18) **Splitter with 6-ft. input cable and F connector.** 75-ohm input. 75-ohm and 300-ohm outputs. #15-1522

(19) **Splitter with 300-ohm input.** 75-ohm output for VHF. Two 300-ohm outputs for UHF-TV and FM. #15-1251

24k GOLD-PLATED splitters and transformers for extra reliability and superior connections

(20) **Indoor/outdoor matching transformer.**

Connects 300-ohm screw terminals on antenna or TV to F connector on 75-ohm coax cable lead-in. #15-1230

(21) **2-way splitter/combiner.** 75-ohm input. Two 75-ohm outputs. With ground connection. #15-1234

(22) **4-way splitter.** Same as Fig. 21 but with four outputs. #15-1235

(23) **VHF low/UHF splitter and combiner.** #15-1237

(24) **Two-way bidirectional TV/CATV gold-plated splitter.** Double shielded to reduce signal loss. Use with digital cable, Internet or regular TV. #15-2582

(25) **4-way bidirectional gold-plated splitter.** Double shielded to reduce signal loss. Use with digital cable, Internet or TV. #15-2583

(26) **In-line 75-ohm DC block.**

Protects TV or VCR input by blocking out DC voltage used to power a remote signal amplifier. #15-1259

In-line 75-ohm 6dB attenuators.

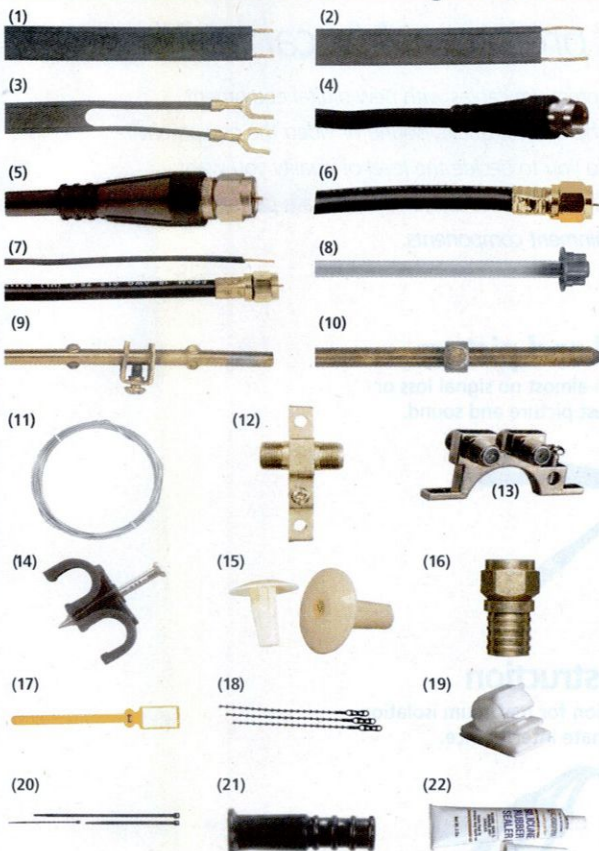

(27) **F jack to plug.** #15-1257

(28) **F jack to jack.** #15-1258

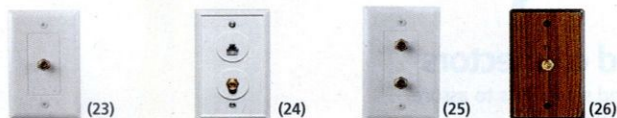

(29) **AC line filter.** Reduces interference produced by appliances and conducted through house wiring. Just plug into grounded (3-prong) AC outlet. UL listed. #15-1111

Antenna installation is easy with the right cable and hardware

- (1) **300-ohm (flat) twin-lead cable.** Two 20-gauge stranded copper conductors enclosed by low-loss foam insulation and heavy-duty polyethylene outer jacket. 50-ft. #15-1174 100-ft. #15-1175
- (2) **Economy 300-ohm (flat) cable.** Lighter weight than fig. 1. Indoor use only. 40 feet. Brown. #15-0004
- (3) **8-foot 300-ohm (flat) cable.** #15-1532
- (4) **Ready-to-use 75-ohm (round) foam coax cable assemblies.** F connector installed at each end. 50-ft. #15-1526 100-ft. #15-1527
- (5) **Ready-to-use premium RG-6 75-ohm (round) coax cable assemblies.** For indoor/outdoor use. Great for mini-dish satellite, outdoor TV antenna or cable-TV hookups. Weatherproof silicon-filled F connector at each end. 50-ft. #15-1548 100-ft. #15-1549
- (6) **RG-6QS.** Quadruple shielding for high interference rejection. F connector at each end. 25-ft. #15-1567 50-ft. #15-1568 100-ft. #15-1569
- (7) **RG-6 cable with built-in ground wire.** Ideal for satellite dish hookup. 25-ft. #15-1579 50-ft. #15-1572 100-ft. #15-1570
- (8) **"Wall-thru" lead-in tube.** Installs in walls up to 13" thick. #15-1200
- (9) **Economy 4-ft. ground rod.** #15-530
- (10) **UL listed 8-foot ground rod and clamp.** Copper plated. #15-529
- (11) **Aluminum ground wire.** 40 feet. 8 gauge. Use with ground rod (see fig. 9 or 10). #15-035
- (12) **Grounding block.** Helps prevent static electricity buildup in 75-ohm (round) coax cable antenna lead-in. Use with ground rod (fig. 9 and 10). #15-909
- (13) **Dual grounding block.** Same as above, but with two 75-ohm connections. #15-920
- (14) **Dual coax nail-in clips.** Secure RG-6, RG-58 or 2 RG-59 (round) cables to outside wood or interior baseboards. Holds 2 cables. Set of 10. Black #278-1662
- Single-cable clips.** For RG-59 cable. Set of 10: Black #278-1660, White #278-1659
- (15) **Coax feedthrough bushing.** For professional-looking entry/exit of coax (round) cable through walls. For RG-59 cable. 2-pack. #278-1643
- (16) **Weatherproof crimp-on F connector for RG-6 or RG-6QS cable.** Silicon filled. #278-236
- (17) **Cable/tie marker.** For cables up to 3/8" diameter. Set of 10. #278-1648
- (18) **Beaded wire ties.** UV stabilized. 6 1/8" long. Set of 10. #278-1619
- (19) **Cable clips.** With adhesive backing to keep cable secure. Accepts 3/8" cable. Set of 10. #278-1640
- (20) **75-piece black UV cable tie assortment.** 25 pieces each size: 3/8x3 3/4", 3/8x4 3/4", 3/8x7 1/2". #278-1656
- (21) **Coax weather boots.** Weatherizes connections. Fits RG-59/RG-6. 2-pack. #278-1658
- (22) **Silicone rubber sealant.** Ideal for sealing outdoor antenna wiring. Cures to a tough, flexible moistureproof seal. 3-oz. tube. #64-2314

F-connector wall plates

Wall plates add a professional look to your installation

All fit standard empty electrical wall box. Gold-plated connectors assure reliable hookups and maximum signal transfer.

- (23) **White wall plate with gold-plated F connector.** Accepts 75-ohm cable with F connectors for hookup between wall and TV/VCR. #15-2041
- (24) **White wall plate with gold-plated F connector and a modular phone jack.** Great for mini-dish satellite TV hookups. #15-2034
- (25) **White wall plate with two gold-plated F connectors.** #15-2042
- (26) **Woodgrain wall plate with gold-plated F connector.** #15-2033

Video game switches

TV/video game switch with built-in signal splitter. Separate VHF and UHF outputs for TV. UHF: 300-ohm. VHF: 75-ohm. #15-1268

Automatic TV/video game switch. Switches to video game automatically when you turn on game. Accepts RCA plug from video game. Provides 75-ohm (round cable) input and output for antenna, TV or VCR. #15-1267

For Sony PlayStation® and PlayStation® 2. Switches automatically from TV input to video game. #26-609

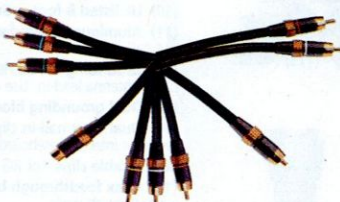

For Nintendo 64. #26-610

"Why choose RadioShack premium A/V cables?"

Cost prevents most manufacturers from including premium cables with new digital equipment. And the standard cables they do include can't deliver the highest-quality sound or video the equipment is capable of producing. They'd rather leave it up to you to decide the level of quality you want to realize from your equipment. RadioShack's premium A/V cables deliver the ultimate performance from all your home entertainment components.

Exceptional sound and picture

Our premium cables perform with almost no signal loss or distortion to deliver the very best picture and sound.

Innovative construction

Like nitrogen-injected foam insulation for maximum isolation and dual shielding to eliminate interference.

24k gold-plated connectors

Help prevent corrosion and signal loss to assure maximum signal transfer.

Without a doubt, these are some of the highest-quality cables available. They are **GUARANTEED** to deliver the absolute best signal that your A/V components can produce. Premium construction from the inside and out!

COAXIAL-SOLID

COAXIAL-MULTI

FIBER-OPTIC

TWISTED-WIRE

Stereo audio cable

Innovative dual twisted-pair design isolates each channel's positive and negative components to reduce hum and crosstalk, even on long cable runs. 100% shielding from cable to contacts helps keep the signal in and interference out. 99.997% pure oxygen-free copper core delivers a cleaner signal path. Two 24k gold-plated, low-capacitance phono (RCA) plugs at each end. Ferrite toroidal filters remove EMI and RF interference.

3-foot. #15-1001 **6-foot.** #15-1002
12-foot. #15-1003 **20-foot.** #15-1004

Twisted-Wire
Stereo Audio Cable

Twisted-Wire
Stereo A/V Cable

Stereo audio/video cable

Connects from VCR or satellite receiver to A/V receiver or TV. Dual twisted-pair audio cable creates a balanced signal for maximum audio clarity. 100% shielding virtually eliminates interference. Pure, oxygen-free copper cores with three 24k gold-plated phono (RCA) plugs at each end. In-line ferrite toroidal filters remove EMI and RF interference.

3-foot. #15-1079 **6-foot.** #15-1080 **12-foot.** #15-1081

Video cable

Connects video output of VCR or satellite receiver to video input of A/V receiver or TV. Pure, oxygen-free copper core for a colorful, clear picture. 100% shielding. 24k gold-plated RCA plug at each end. In-line ferrite toroidal filter.

3-foot. #15-1076 **6-foot.** #15-1077 **12-foot.** #15-1078

Coaxial-Multi
Video Cable

Twisted-Wire
Stereo Audio
S-Video Cable

Stereo audio/S-Video cable

Connects DVD or satellite receiver to A/V receiver or TV. Dual twisted-pair audio cable isolates each channel's positive and negative components to reduce hum and crosstalk, even on long cable runs. Dual shielding. Pure, oxygen-free copper cores for a cleaner signal path. Two 24k gold-plated RCA plugs and one S-Video connector at each end.

3-foot. #15-1082 **6-foot.** #15-1083 **12-foot.** #15-1084

S-Video cable

Connects DVD or satellite receiver to TV. Dual shielding ensures maximum protection. Pure, oxygen-free copper center conductors. 24k gold-plated S-Video connector at each end. Nitrogen-induced, low-loss foam for unsurpassed insulation.

6-foot. #15-1070 **12-foot.** #15-1071

Coaxial-Multi
S-Video Cable

Video to S-Video
Conversion Cable

Video to S-Video cable

Connects VCR or camcorder to TV. Ideal for converting composite video output of VCR to S-Video for connection to TV with S-Video input. 100% shielding. Pure, oxygen-free copper conductors, 24k gold-plated contacts.

6-foot. #15-1598

Optical digital audio cable

Connects DVD or CD to A/V receiver. High-bandwidth optical fiber ensures totally accurate sound reproduction. How accurate? A specially tuned, 0.98mm optical fiber delivers 100% distortion-free audio! Ultra-wide 40MHz bandwidth with less than 0.2dB/meter signal loss preserves signal integrity for pristine audio reproduction. Toslink connector at each end. Fiber is precisely aligned with gold-tipped contacts.

3-foot. #15-1091 **6-foot.** #15-1092 **12-foot.** #15-1093

Fiber-Optic
Digital Audio
Cable

Coaxial-Solid
Cable

Coaxial cable

Connects cable box or satellite receiver to TV. High-efficiency copper-clad core, nitrogen-induced foam insulation and dual shielding. Gold-plated F connector at each end.

3-foot. #15-1073 **6-foot.** #15-1074 **12-foot.** #15-1075

PCM digital audio coaxial cable

Connects DVD to A/V receiver. Pure, oxygen-free copper core. Gold-plated phono connector at each end.

3-foot. #15-1089 **6-foot.** #15-1090

Coaxial-Multi
PCM Digital
Audio Cable

Component video cable

Connects progressive-scan DVD player or satellite receiver to digital TVs and some big-screen TVs. Pure, oxygen-free copper core for a crisp picture. 100% dual foil-bonded shielding. Three 24k gold-plated, low-capacitance phono (RCA) plugs at each end. Color-coded to ensure a correct hookup.

6-foot. #15-1072

Coaxial-Multi
Component
Video Cable

Lifetime Limited Warranty

If a RadioShack product backed by this Lifetime Limited Warranty fails due to a defect in materials or workmanship at any time while owned by the original purchaser, simply return it along with the original sales slip to any participating RadioShack store in the U.S. and RadioShack will replace it. If an identical product is not readily available, RadioShack may offer a substitute. If RadioShack does not offer a substitute or if the substitute RadioShack offers is unacceptable to you, we will refund the full amount of the original purchase price of this product. This warranty does not cover transportation costs, nor does it cover a product subjected to misuse or abuse. **RADIOSHACK MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED. THIS WARRANTY IS YOUR SOLE REMEDY AND RADIOSHACK SHALL NOT BE LIABLE FOR DAMAGES WHETHER DIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL. ALL IMPLIED WARRANTIES ARE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY.** Some states do not allow the exclusion of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may have other rights which vary from state to state.

Video hookup cables
with F connectors

These cables are commonly used to connect a VCR, cable box or satellite receiver to the antenna jack of a TV. Each has an F connector at each end that fits the round, threaded F jacks on VCRs, satellite receivers, TVs, cable boxes and splitters.

- (1) **Gold Series cable with screw-on F connector at each end.**
3-ft. #15-1541
6-ft. #15-1542
12-ft. #15-1543
- (2) **Gold Series cable with push-on F connector at each end.**
3-ft. #15-1515
6-ft. #15-1516
12-ft. #15-1517
- (3) **Gold Series cable with straight push-on F connector at one end and a right-angle push-on F at other.**
3-ft. #15-1513
6-ft. #15-1514
- (4) **RG-6 coax cable.** Screw-on F connector at each end.
1-ft. #15-1590
2-ft. #15-1552

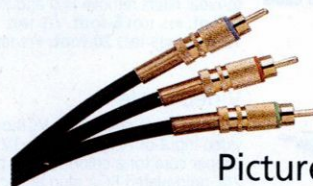

Gold Series audio/video cables
with RCA (phono) plugs

- (5) **Gold Series single cable with one RCA plug at each end.** Use to connect the video-out jack on a VCR, DVD player or satellite receiver to the video input jack on a TV.
3-ft. #15-1518
6-ft. #15-1519
12-ft. #15-1520
- (6) **Gold Series stereo audio/video cable with three RCA plugs at each end.** Use to connect the video-out and stereo audio-out jacks of a stereo VCR, DVD player or satellite receiver to the video and stereo audio inputs of a TV or home theater receiver.
3-ft. #15-1507
6-ft. #15-1508
12-ft. #15-1509
- (7) **Gold Series stereo audio/video cables for tight places.** Three straight RCA plugs at one end, three right-angle RCA plugs at the other. 3 feet long.
#15-1573
- (8) **Gold Series stereo-to-mono VCR dubbing cable.** Three RCA plugs at one end, two at the other. Use to connect a stereo VCR to a mono VCR when copying tapes. 6 feet long.
#15-1521

Gold Series audio/video
cables with S-Video

- (9) **Gold Series stereo audio/video cable with S-Video.** One S-Video and two RCA plugs at each end. Use with DVD, satellite TV and a TV equipped with S-Video jacks for best picture.
3-ft. #15-1576
6-ft. #15-1577
12-ft. #15-1578
- (10) **Gold Series S-Video cable.** One gold-plated S-Video connector at each end.
6-ft. #15-1510
12-ft. #15-1503

Component (RGB) video cables

Picture this!
Move closer to
studio-quality images

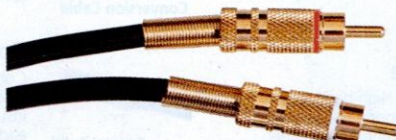

DVD video is originally recorded in component video signals which are used in the broadcasting industry. Compared with S-Video and composite video signals, component video signals reproduce a picture image that's very close to original sources. Connected to a monitor with component video inputs, DVD players can get you closer to that studio-quality picture.

Gold Series component/RGB video cables. Premium wide-bandwidth RG-6 cables with three 24k gold-plated RCA phono plugs at each end, color-coded to make correct hookup easy. Use it for any RGB (Red-Green-Blue) component video hookup, such as connecting a progressive-scan DVD player to a video monitor with RGB jacks. It also connects many new video game consoles.

6-ft. #15-1563
12-ft. #15-1564

Patch cable ideal for a subwoofer

Gold Series subwoofer cable. 12-ft. dual-shielded cable has one gold-plated RCA plug at each end. Gold plating resists corrosion to provide a dependable connection.
#15-1599

High-quality stereo
patch cables

Stereo patch cables. Strong, flexible audio cable has two gold-plated RCA plugs at each end. Shielded.
3-ft. #15-2420
6-ft. #15-2421
12-ft. #15-2422
20-ft. #15-2423

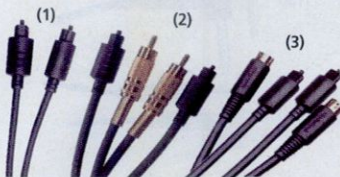

Premium-quality
stereo cables

NEW Gold Series patch cable. Double-shielded cable with solid inner conductor and one high-performance, gold-plated RCA plug at each end. Top choice for DVD and home theater audio hookups, PCM digital audio.
3-ft. #15-2401
6-ft. #15-2402
12-ft. #15-2403

**For better audio and
video hookups,
go for the gold!**

RadioShack's Gold Series cables, adapters and splitters have 24-karat gold-plated contacts to assure maximum reliability and minimum signal loss.

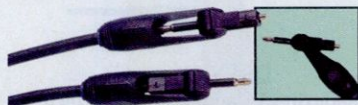

Optical digital audio cables

(1) Fiber-optic cable with Toslink connector at each end. Use to connect a component with an optical digital audio output, such as a CD player, MD or DVD player, to a component with an optical digital audio input, such as a home theater receiver, D/A (digital/analog) converter or a signal processor. 6 foot. #15-1581

(2) Cable with Toslink connector and RCA composite video plug at each end. Connects A/V components with a Toslink jack and RCA video jack. Gold-plated phono plugs. 3 foot. #15-1591 6 foot. #15-1592 12 foot. #15-1593

(3) Cable with Toslink connector and an S-Video plug at each end. Connects A/V components with a Toslink jack and S-Video jack. Gold-plated S-Video plug on each end. 3 foot. #15-1594 6 foot. #15-1595

Fiber-optic cable with changeable Toslink and mini plugs at each end. Build your own fiber-optic cable or adapter. Fit each end of fiber-optic cable with either a Toslink connector or a 1/8" optical mini plug. 6 foot. #15-1597

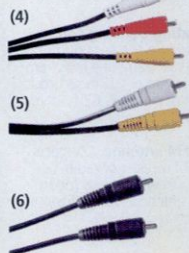

RG-6 coax cable

6-ft. cable with right-angle F connector at one end and straight connector at other end. #15-1536

25-ft. RG-6 cable. F connector at each end. #15-1571

A/V cables with RCA plugs

(4) Standard stereo audio/video cable. 3 RCA plugs at each end. 6 foot. #15-1537 12 foot. #15-1512

(5) 24-ft. standard audio/video cable. 2 RCA plugs at each end. #15-1540

(6) 24-ft. standard audio/video cable. 1 RCA plug at each end. #15-1539

Optical digital audio connectors, adapters, more

Toslink-to-Toslink connector. Use to join two optical digital audio cables when a longer length is needed. #15-1583

Toslink to 1/8" optical plug adapter. Use to connect an optical digital audio cable with a Toslink connector to a component with a 1/8" optical digital audio jack. Example: Connect a home CD player to a MiniDisc recorder. #15-1584

Right-angle Toslink adapter. Ideal for tight spaces. Use with DVD, MD or CD players with fiber-optic input/output. #15-1589

Toslink optical signal extension amplifier. Helps minimize optical signal loss if your optical digital audio cable runs over 16 feet. Output gain of 4.5dB enhances optical signal. Toslink jacks. #15-1588

Optical splitter. Splits optical digital audio cable to two optical digital audio outputs. #15-1585

Set of 4 caps for Toslink jacks. Seal off and protect any unused Toslink jacks on your audio/video components to maintain top condition for future use. #15-1979

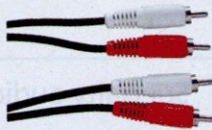

Computer IEEE-1394 cable

IEEE-1394 cable is one of the fastest new ways to transmit high-speed digital audio and video signals with exceptional results. Ideal for hooking up an audio/video component, like a digital camcorder, to your computer.

IEEE-1394 cable. Connects audio/video equipment like a digital camcorder to transmit digital audio and video to your computer. Gold-plated ends. 6-foot 6-pin to 4-pin cable. #15-2310

Patch cables for CD changers, receivers

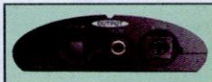

Stereo patch cables. Two RCA (phono) plugs at each end. Usage example: connect a home CD changer or player to a stereo receiver or amplifier. 3 foot. #42-2351 6 foot. #42-2352 12 foot. #42-2356 20 foot. #42-3501 36 foot. #42-3502

6-ft. patch cable with piggyback jacks. Two gold-plated RCA plugs at one end, two gold-plated RCA plugs with piggyback jacks at the other. Great for custom hookups. Usage example: using another stereo patch cord, you can connect one CD player to two amplifiers or connect two CD players or turntables to one amplifier. #42-2620

Audio/video phono output converter

Converts analog audio outputs to a digital audio output (one way). Also, converts composite video to S-Video, or S-Video to composite video (both ways).

Changes an analog audio signal into a digital audio signal. Also converts a composite video signal to S-Video. Lets you connect older A/V equipment that has only a composite video output and audio outputs to newer equipment that has a digital audio input and S-Video input. You can convert audio phono outputs to either an optical (Toslink) or a coaxial (RCA coax) digital audio output. Lets you connect almost any new laptop (most only have an S-Video output) to any TV with a composite video input. Great for viewing laptop on a TV at home or in the office. On/off switch. **RSSP** #15-1242

Toslink/coaxial (2-way) converter

Toslink and coaxial digital audio jacks.

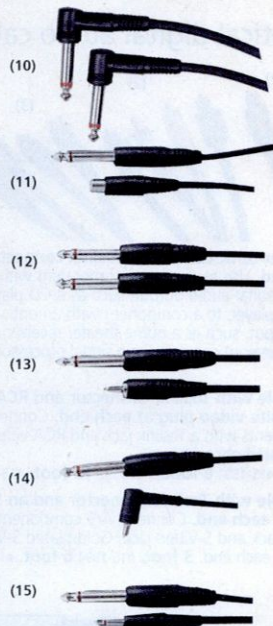

Add a Toslink jack to any A/V equipment that has an unused coaxial jack. Or, add a coaxial jack to any A/V equipment that has an unused Toslink jack. Connect any A/V component that only has a coaxial digital audio output to any A/V component that only has an optical digital audio (Toslink) input, and vice versa. On/off slide switch. Simple to use. #15-1228

Plug it in and crank it up! Mic and musical instrument cords and adapters

Fig.	Description	Feet	Cat. No.
Shielded mic cable extensions			
1	¼" plug to ¼" jack	25	42-2379

15	¼" plug to ¼" mini plug	6	42-2433

Did Ya Know?

RadioShack's audio cables are factory pretested to assure reliability.

XLR mic adapters and cords

3-pin XLR in-line jack.
#274-011

Female-to-female 3-pin
XLR adapter. #274-014

Male-to-male 3-pin XLR
adapter. #274-015

¼" jack-to-A3M XLR plug
adapter/transformer.
#274-017

A3F XLR jack-to-¼" plug
adapter/transformer.
#274-016

15-foot XLR mic extension
cable. 3-pin XLR plug at one
end, 3-pin XLR jack at the
other. #33-4002

16-foot XLR mic adapter
cable. Shielded cord has
3-pin female XLR jack at one
end, ¼" plug at the other.
#33-4012

Specialty audio cables, adapters and FM antenna

Airline headphone adapter.
Use your own stereo headphones
when you fly. Accepts ¼" stereo
headphone plug. Fits the two ¼"
mono jacks on the seats of many
commercial airliners. #42-2495

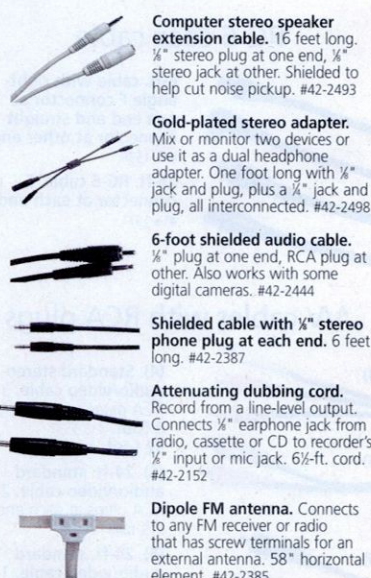

Share your scanner radio. Ideal
for car races. Connects two
scanner headsets to one scanner.
¼" mono plug at one end. Two
¼" mono jacks at other. #42-2437

**Two ¼" stereo plugs to a ¼"
jack.** Connects PC modem and
sound card to multimedia
speakers simultaneously. 6"
long. #42-2496

**Gold-plated multimedia
headset Y-cable.** Connects
phone headset to computer
sound ports. ¼" jack at one end,
two ¼" plugs at the other.
#42-2428

¼" computer patch cable. ¼"
stereo plug at each end. Connects
sound card to audio components.
#42-2497

**Computer stereo speaker
extension cable.** 8 feet long. ¼"
plug at one end, ¼" jack at the
other. Extra shielding helps reduce
noise on amplified speakers.
#42-2492

**Computer stereo speaker
extension cable.** 16 feet long.
¼" stereo plug at one end, ¼"
stereo jack at other. Shielded to
help cut noise pickup. #42-2493

Gold-plated stereo adapter.
Mix or monitor two devices or
use it as a dual headphone
adapter. One foot long with ¼"
jack and plug, plus a ¼" jack and
plug, all interconnected. #42-2498

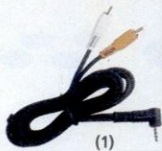

6-foot shielded audio cable.
¼" plug at one end, RCA plug at
other. Also works with some
digital cameras. #42-2444

**Shielded cable with ¼" stereo
phone plug at each end.** 6 feet
long. #42-2387

Attenuating dubbing cord.
Record from a line-level output.
Connects ¼" earphone jack from
radio, cassette or CD to recorder's
¼" input or mic jack. 6½-ft. cord.
#42-2152

Dipole FM antenna. Connects
to any FM receiver or radio
that has screw terminals for an
external antenna. 58" horizontal
element. #42-2385

Y-adapters for portable players

(1)

(2)

Perfect for playing your MP3 or portable CD through your home stereo system, or through a car stereo system with line-level RCA input jacks.

Pillow speakers

- (1) **Our best pillow speaker.** Ideal for use with clock radios and TVs with a headphone jack. Volume control, 6-foot cord with mono $\frac{1}{8}$ " plug. For use with CD players or other stereo equipment, add #274-374 or #274-363 plug adapter. #33-209
- (2) **Standard pillow speaker.** 4-foot cord, monoaural $\frac{1}{8}$ " plug. Add #274-374 or #274-363 plug adapter for use with stereo equipment. #33-206

Helpful for hearing difficulties:
RadioShack stereo amplified listeners

Boost the sound around you. Ideal for church, meetings, TV or anytime you want to hear sounds louder without disturbing others. Just add headphones.

- (3) **Pocket-size amplified listener.** Easy to take along—only $2\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ ". Requires stereo headset with $\frac{1}{8}$ " plug and two "AAA" batteries. #33-1096
- (4) **Amplified listener with 3-band equalizer.** Lets you tailor response to emphasize voice, midrange or treble. Requires stereo headset with $\frac{1}{8}$ " plug and two "AAA" batteries. $2\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ ". #33-1097

Replacement earpads for headphones

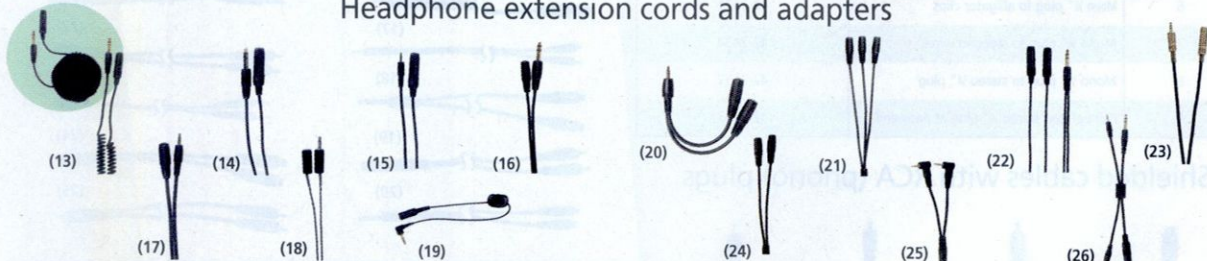

- (5) **Earpads for many RadioShack and other lightweight stereo headphones.** Set of 4. #33-374
- (6) **Earpads for many lightweight headsets.** Set of 4. #33-377
- Earpads designed for mini stereo headsets. (Not shown.) Pair. #33-375
- (7) **Earpads for some RadioShack wireless headphones and other larger headphones.** Pair. #33-379
- (8) **Earpads for many micro-size headsets.** Set of 4. #33-376

Our best! Gold Series
headphone plug adapters

- (9) **Accepts $\frac{1}{8}$ " stereo plug. Plugs into $\frac{1}{4}$ " mono jack.** Use your stereo headset with a monoaural TV, recorder, CB, shortwave or scanner radio. #274-882
- (10) **Accepts $\frac{1}{8}$ " stereo plug. Plugs into $\frac{1}{4}$ " stereo jack.** Connects a headset with $\frac{1}{8}$ " plug to a $\frac{1}{4}$ " headphone jack. #274-876
- (11) **Accepts $\frac{1}{8}$ " stereo plug. Plugs into $\frac{1}{4}$ " stereo jack.** Connects a headset with $\frac{1}{8}$ " stereo plug to an $\frac{1}{4}$ " stereo headset jack. #274-875
- (12) **Accepts two $\frac{1}{8}$ " stereo plugs. Plugs into $\frac{1}{4}$ " stereo jack.** Connects two headsets to one $\frac{1}{4}$ " stereo headphone jack. #274-879
- Accepts two $\frac{1}{8}$ " stereo plugs. Plugs into $\frac{1}{4}$ " stereo jack.** (Not shown.) Connects two headsets with $\frac{1}{8}$ " plugs to one $\frac{1}{4}$ " jack. #274-894

Headphone extension cords and adapters

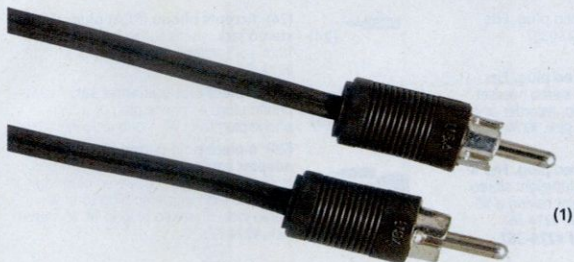

- (13) **Gold Series 24-foot $\frac{1}{4}$ " coiled stereo headphone extension cord.** Nontangling. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{4}$ " stereo jack at the other. #42-2553
- (14) **Gold Series 20-foot $\frac{1}{4}$ " stereo headphone extension cord.** Extends cord of full-size headphones. Noncoiled. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{4}$ " stereo jack at the other. #42-2556
- (15) **Gold Series 20-foot $\frac{1}{4}$ " to $\frac{1}{8}$ " stereo headphone adapter/extension cord.** Connects full-size stereo headset to a portable CD, MP3 or cassette. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{8}$ " stereo jack at the other. #42-2561
- (16) **Gold Series 20-foot $\frac{1}{4}$ " to $\frac{1}{8}$ " stereo headphone adapter/extension cord.** Connects headphones with $\frac{1}{8}$ " plug to a stereo that has a $\frac{1}{4}$ " headphone jack. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{8}$ " stereo jack at the other. #42-2560
- (17) **Gold Series 20-foot $\frac{1}{4}$ " stereo headphone extension cord.** Plugs into portable CD, MP3, cassette, boombox or home stereo that has an $\frac{1}{4}$ " stereo headphone jack. Flexible cord. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{4}$ " stereo jack at the other. #42-2562
- (18) **Enjoy TV or radio sound without disturbing others.** 20-foot $\frac{1}{4}$ " monoaural earphone extension cord. Has $\frac{1}{4}$ " monoaural plug at one end and $\frac{1}{8}$ " monoaural jack at the other. #33-176
- (19) **Gold Series add-on volume control for lightweight stereo headphones.** Perfect for joggers. 1-foot cord. In-line attenuating volume control. Gold-plated $\frac{1}{8}$ " right-angle stereo plug at one end. Gold-plated $\frac{1}{8}$ " stereo jack at the other. #42-2559
- (20) **Gold Series Y-adapter.** Connects two lightweight stereo headphones to a portable CD, MP3, cassette player or stereo with $\frac{1}{4}$ " headphone jack. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Two gold-plated $\frac{1}{8}$ " stereo jacks at the other. #42-2570
- (21) **Gold Series 3-way adapter.** Connects three lightweight stereo headphones to one player or stereo with an $\frac{1}{4}$ " headphone jack. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Three gold-plated $\frac{1}{8}$ " jacks at the other. 6" long. #42-2458
- (22) **Gold Series 3-ft. Y-adapter.** Connects two full-size headphones to one $\frac{1}{4}$ " stereo headphone jack. Gold-plated $\frac{1}{4}$ " stereo plug at one end. Two gold-plated $\frac{1}{8}$ " stereo jacks at the other. #42-2568
- (23) **Gold Series 6-foot gold $\frac{1}{4}$ " headphone extension cord.** Gold-plated $\frac{1}{4}$ " stereo plug at one end. Gold-plated $\frac{1}{4}$ " stereo jack at the other. #42-2482
- (24) **Share your scanner radio.** Great for car races and air shows! Y-adapter cord lets you connect two scanner headphones to one scanner. $\frac{1}{4}$ " mono plug at one end. Two $\frac{1}{8}$ " mono jacks at the other. 4" flexible cable. #42-2437
- (25) **Gold Series airline Y-adapter.** Use your OWN stereo headphones when you fly! Adapter accepts the $\frac{1}{4}$ " stereo plug of your headphones. Fits the two $\frac{1}{4}$ " audio jacks on the seats of many commercial airliners. #42-2495
- (26) **Multi-use stereo "spider" adapter.** Versatile! Mix or monitor two devices or use it as a dual headphone adapter. Gold-plated $\frac{1}{4}$ " and $\frac{1}{8}$ " stereo plugs to gold-plated $\frac{1}{4}$ " and $\frac{1}{8}$ " jacks—all interconnected. One foot long. #42-2498

Prewired connectors • Lengths up to 50 feet

Each is factory tested to assure a dependable connection

Don't let a poor hookup spoil your listening. These quality RadioShack cables are perfect for replacement or as an upgrade when longer cables are needed.

Audio plugs and jacks.

1/4" plugs & in-line jacks

Standard 1/4" phone plugs

The 1/4" (6.5mm) size is typically used for full-size stereo headphones, microphones and extension cords for mics, musical instruments and PA speakers. Replace a faulty headphone or microphone plug yourself and save money.

Fig.	Phone Plug Description	Cat. No.	Pkg. of
1	3-cond. 1/4", shielded, grip barrel	274-1546	1
	3-cond. 1/4", shielded	274-285	1
2	3-cond. 1/4", 1/8"-dia. barrel	274-139	2
	2-cond. 1/4"	274-1536	2
3	2-cond. 1/4", "big barrel"	274-1539	2
	2-cond. 1/4", shielded	274-1544	2
	2-cond. 1/4", shielded, spring	274-1545	1
4	2-cond. 1/4", 90° type, solderless	274-266	1
5	2-cond. 1/4", 90° type, shielded	274-254	2

Premium gold-plated phone plugs

Upgrade to corrosion-resistant gold-plated plugs for superior signal transfer, high dependability and better-quality sound. Choose solder-type plugs for best signal transfer or solderless plugs for easy cable attachment.

(6) Gold-plated stereo 1/4" solderless phone plug. #274-866

(7) Gold-plated mono 1/4" solderless phone plug. #274-867

(8) Mono 1/4" phone plug. Coil strain relief holds cable to help prevent damage. #274-855

Fig.	In-line Jack Description	Cat. No.	Pkg. of
9	2-conductor (mono) 1/4"	274-340	2
10	3-conductor (stereo) 1/4"	274-141	2
11	NEW Heavy-duty 3-cond. (stereo) 1/4"	274-142	1

Banana plugs

Gold-plated banana plugs. Accepts heavy-duty 12-gauge speaker cable. Screw-type, two-piece construction. Easy-grip sleeves. #278-306

Gold-plated dual banana plug. Standard 1/4" spacing. Accepts 10 to 12-gauge wire and RadioShack's famous Megacable® speaker wire. Perfect fit for speakers with dual banana jacks. #278-308

Lockable banana plugs. Gold-plated, accepts 12-gauge wire or cable. Includes one red and one black-banded plug. #278-307

Panel-mount jacks

Open-frame,
open-circuit

Size	Cond.	Cat. No.
1/4"	2	274-252
1/4"	3	274-312
1/4"	2	274-251

Enclosed,
open-circuit

Size	Cond.	Cat. No.
1/4"	2	274-280
1/4"	3	274-249

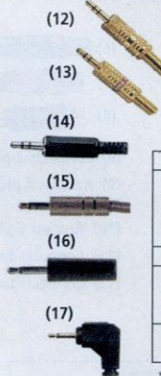

Accept phone plugs. Three-conductor types are for stereo use. Closed-circuit types are often used as headphone jacks on equipment that has built-in speakers. Can be wired so that inserting a headphone plug turns off the speakers.

Size	Cond.	Cat. No.
1/4"	2	274-255
1/4"	2	274-248

Size	Cond.	Cat. No.
1/4"	3	274-245
1/4"	3	274-246

1/8" & 3/32" plugs & in-line jacks

(12) Stereo 3-conductor 1/8" solderless gold-plated mini phone plug. #274-869

(13) Stereo 3-cond. 1/8" (3.5mm) phone plug. Coil strain relief. #274-858

NEW Mono 2-cond. solderless gold-plated 1/8" (3.5mm) phone plug. Coil strain relief. #274-868

Fig.	Phone Plug Description	Cat. No.	Pkg. of
14**	3-cond. 1/8", mini-size	274-284	2

17**	3-cond. 3/32", 90°, strain	274-244*	1
	3-cond. 3/32", 90°, strain	274-298*	1

* Gold plated ** Body styles may vary

Four-piece 1/8" plug and jack set. Includes two 1/8" 2-conductor (mono) plugs, two in-line jacks. #274-283

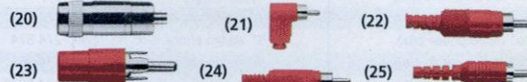

In-line phone jacks. Use to make extension cords for computer headphones, microphones.

Fig.	In-line Jack Description	Cat. No.	Pkg. of
18	3-conductor (stereo) 1/8"	274-274	2
19	2-conductor (mono) 1/8"	274-333	2

Phono (RCA) plugs & jacks

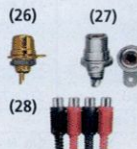

Gold phono (RCA) plug. Heavy-duty. Coil strain relief. #274-850

Phono (RCA-type). For replacement use or building your own stereo patch cords, speaker cables and custom hookup cables.

Fig.	Phono Plug Description	Cat. No.	Pkg. of
20	Shielded, solder-type	274-339	2
21	Solderless 90°, 2 red, 2 black	274-383	4
22	Solderless, 2 red, 2 black	274-384	4
23	Color-coded, solder-type	274-321	8
24	With plastic grip-style covers	274-319	4
25	Strain relief, 3 red, 3 black	274-451	6

Phono (RCA) jacks

(26) Gold-plated panel-mount RCA jacks. Mount in 1/8"-diameter holes. #274-852

(27) Panel-mount RCA jacks. Shielded. #274-346

(28) Plastic in-line RCA jacks. Strain reliefs help prevent wire breaks and damage. #274-337

Phono (RCA) jack boards

Board with 8 standard-type phono (RCA) jacks. Readily accepts solder for solid electrical connections. #274-370

Board with 4 standard-type phono (RCA) jacks. Readily accepts solder. #274-322

XLR audio connectors

3-pin XLR in-line jack. For custom "pro" audio hookups and building extension cords for balanced-type microphones. #274-011

(1)

(2)

(1) Female-to-female 3-pin XLR adapter. Perfect for "pro" audio hookups and when adding another cable to extend your mic's reach. Joins two male plugs. #274-014

(2) Male-to-male 3-pin XLR adapter. Connects two female XLR jacks. #274-015

(3)

(4)

(3) 3-pin XLR plug. For "pro" public address and audio hookups. #274-010

(4) 3-pin XLR panel-mount jack. #274-013

DIN-type connectors

(5)

(6)

DIN connectors are used in some video surveillance equipment, European audio equipment and other devices.

(5) 5-pin DIN plug. #274-003

(6) 6-pin mini DIN plug. #276-1474

CB and Ham mic plugs

(7)

(8)

(9)

(7) 8-pin Ham microphone plug. Fits microphone input jack of many Amateur Radio transceivers. #274-025

(8) 4-pin panel-mount jack. Used as microphone input jack on some CB radios and other transceivers. #274-002

(9) 4-pin mic plug. Fits #274-002. #274-001

"Car radio" plugs

Solderless Motorola-type plug. Fits antenna jack of many car radios and some older scanners. #274-709

Solderless Motorola-type in-line jack.

(Not shown.) #274-710

XLR mic adapters and cables

(10)

(11)

(12)

(13)

(10) 1/4" jack-to-A3M XLR plug adapter/transformer. Connects a mic cable with 1/4" plug to an amplifier, mixer or sound system that has an XLR input jack. #274-017

(11) A3F XLR jack-to-1/4" plug adapter/transformer. Connects a mic cable with XLR plug to sound equipment that has a 1/4" input jack. #274-016

(12) 15-foot XLR microphone extension cable. Flexible, durable 3-wire shielded cable with XLR plug at one end, XLR jack at the other. #33-4002

(13) 16-ft. XLR to 1/4" plug microphone cable. Locking XLR plug at one end, gold-plated 1/4" phone plug at the other. Use to connect a mic with XLR connector to equipment with a 1/4" input jack. Magnetic shielding helps reduce noise and hum. #33-4012

Speaker terminals

#274-631

#274-632

Speaker terminal plates. For secure hookups. Great for custom speakers or upgrading older speakers.

Description	Cat. No.
Gold-plated 2-position terminal	274-632
Gold-plated 2-position terminal and phono jack	274-631
Speaker terminal for Megacable®, accepts banana plugs	274-630
8-position pushbutton terminal	274-623
4-position pushbutton terminal	274-622

Get the Best Connections

Whether you're connecting a home stereo or installing a professional-level PA system, we've got the pieces you need to bring it all together for great sound.

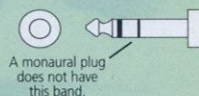

Q&A QUESTION:

What's the difference between audio plugs?

ANSWER:

Phone plugs are commonly used on headphone, microphone and musical instrument cords. Available in 1/4" (6.35mm), 1/8" (3.5mm) and 1/16" (2.5mm) sizes. RadioShack stocks stereo (3-conductor) and mono (2-conductor) types and the matching sockets, called jacks.

1/4" Phone Plug
3-conductor (stereo) plug is shown.

A monaural plug does not have this band.

1/8" Phone Plug
Also called mini plug. A 2-conductor (mono) plug is shown.

1/16" Phone Plug
Also called submini plug. A 2-conductor (mono) plug is shown.

Phono (RCA) Plugs

Used primarily for "line-level" audio or video hookups and for speakers. For example, a shielded cable with phono plugs is used to connect a CD player to a stereo receiver.

Phono Plug
Also called RCA plug

Phono Jack
Also called RCA jack

XLR Connectors

Used in custom "pro" audio hookups to connect microphones to PA amps, mixers or extension cords. These hookups are balanced, which helps cut noise and hum pickup.

XLR Plug
Used in "pro" microphones, PA and audio components.

XLR Jack
Used in "pro" microphones, PA and audio components.

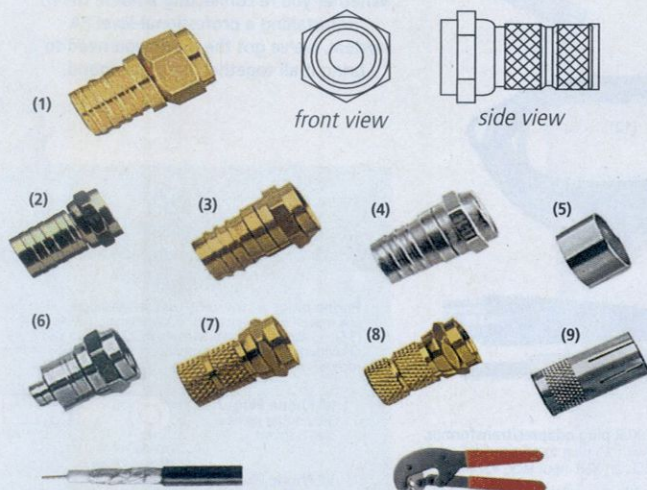

DIN-Type Connectors

Used in some video surveillance equipment, some European audio equipment, special-purpose devices and older computers.

75-ohm F connectors for TV antenna, VCR, satellite TV and cable TV hookups

See page 117 for bulk coax cable and connector installation tools

(10) Indoor splicers for 75-ohm cable. Pkg. of 2. #278-226

(11) F-61 panel-mount F jack. Pkg. of 2. #278-212

(1) Weatherproof F connectors. Silicon-filled for outdoor use. For RG-6 and RG-6QS coax cables. #278-236

S-Video coupler and plug

(12) S-Video coupler. Joins two S-Video plugs. #278-455

(13) S-Video plug. For 6.5mm cable. #278-451

Hookup hassles solved! Quality F adapters for virtually any connection

(14) Gold-plated F-81 coupler. Need a longer cable between TV and VCR? Want to move your cable TV box to another room? Use this coupler to join the cable you already have with another cable to get the length you need. Joins two F connectors. #278-304 Standard F-81 coupler. #278-213

(15) Gold-plated F screw-on to push-on adapter. Useful when equipment is disconnected and reconnected often, such as moving a VCR, cable box or video game for temporary use in another room. #278-291 Standard screw-on to push-on adapter. #278-218

(16) Gold-plated right-angle F adapter. A "must" for tight places. Helps prevent damage to jack on equipment and avoid sharp bends that could degrade cables. #278-305 Standard right-angle F adapter. #278-221

Right-angle screw-on to push-on adapter. #278-235

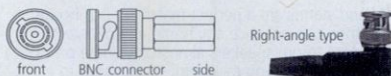

(17) Gold-plated F plug to 1/8" jack adapter. Use to connect a VCR, external antenna, cable box or satellite receiver to external antenna jack on many pocket TVs. #278-267 Standard F plug to 1/8" jack adapter. #278-257

(18) Gold-plated F plug to RCA jack adapter. #278-290 Standard F plug to RCA jack adapter. #278-252

(19) Gold-plated F double-male adapter. Joins two female F jacks. For in-line amplifier, splitter and various custom hookups. #278-275 Standard F male-to-male adapter. #278-219

Fig.	Accepts	Fits	Plating	Cat. No.

BNC connectors and adapters

Solderless right-angle male BNC. Installs easily on stripped RG-6 or RG-58 coax. Strain relief. #278-126

(1) Solderless male BNC. For RG-58. #278-185

(2) Solderless right-angle male BNC. For RG-58 cable. #278-127

Twist-on male BNC. RG-58 cable. #278-103

Gold-plated twist-on male BNC. #278-102

Twist-on male BNC. For RG-59, RG-62. #278-104

BNC chassis-mount jack. Type 1094. #278-105

BNC 50-ohm terminator. Terminates Ethernet connections. #278-270

TNC-to-BNC adapter. #278-144

BNC right-angle adapter. #278-116

(3) BNC T-adapter. Female-female-female configuration. #278-111

(4) BNC T-adapter. Female-male-female configuration. #278-112

BNC female-to-female coupler. Type UG-914. #278-115

Gold-plated BNC female-to-female coupler. #278-119

BNC female-to-phono plug. #278-250

Gold-plated BNC female-to-phono plug. #278-301

*Gold-plated version.

UHF connectors

(10) **Premium PL-259 UHF-type coaxial connector.** Silver-plated body plus low-loss TEFLON® insulator that stands up to the heat of soldering. For RG-8, RG-8M, RG-58 or RG-59 coax cable. #278-188

Standard solder-type PL-259 UHF-type coaxial connectors. Pkg. of 2. #278-205

(11) **UG-176 reducers/adapters.** Adapt standard PL-259 for RG-59 or RG-8/M coax cables. Pkg. of 2. #278-204

UG-175 reducers/adapters. Adapt standard PL-259 for RG-58 coax cable. Pkg. of 2. #278-206

(12) **SO-239 chassis-mount coaxial socket.** #278-201

(13) **Solderless PL-259 plug.** Installs on RG-58 coaxial cable. Pkg. of 2. #278-196

(14) **No-crimp solderless PL-259 plug.** For RG-58 cable. Installs by tightening one setscrew. #278-186

(15) **Solderless twist-on PL-259.** Installs on RG-59 or RG-8/M coax cable. #278-191

(16) **Screw-type solderless PL-259.** Installs on RG-58 or RG-59 coax cable. #278-193

UHF plug adapters

Fig.	Accepts	Fits	Cat. No.
17	BNC Plug	SO-239	278-121
18	F	SO-239	278-258

Double PL-259. Joins two SO-239s. For low-pass filter and other hookups. #278-192

PL-258 coupler. Double female. Joins two PL-259s. #278-1369

PL-259 T-adapter. Two SO-239 sockets to a PL-259 plug. Useful in beam antenna phasing lines. #278-198

UG-646 style in-line right-angle adapter. Use in tight spaces to prevent damage to cable and socket. #278-199

"Scanner" adapter. Accepts a PL-259 plug. Fits Motorola-type antenna jack on older scanner radios and car radios. #278-208

N adapter

UHF-to-N adapter. Adapts a PL-259 to fit female N connector. #278-156

Mini-UHF connector/adapters

(19) **Double-female adapter.** Joins two male mini-UHF connectors. #278-172

(20) **Twist-on connector.** No crimping or soldering. For RG-58 coax cable. #278-168

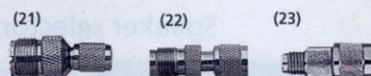

Fig.	Accepts	Fits Mini-UHF	Cat. No.
21	PL-259	Female	278-174
22	TNC Male	Female	278-146
23	TNC Female	Male	278-148

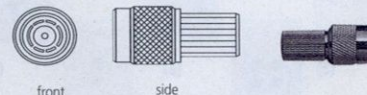

European-TV adapter. Couples a male F connector and PAL-type antenna jack. #278-261

European-TV adapter. Couples a female F connector and female PAL. #278-265

TNC connectors and adapter

No-crimp solderless male TNC. For RG-58 cable. No special tools needed—just tighten the setscrew. Accepts cable with solid or stranded center conductor. #278-184

Twist-on TNC male RF connector. For RG-58 cable. Easy to use—simply cut cable ends to match specified length, align the cable's center conductor with the hole in connector body and twist it on. #278-140

Double-female TNC adapter. #278-142

OmniMount® budget mounting kit

OmniMount AB2. Ideal for satellite and surround speakers. Works with most makes and models. Tilt-and-swivel design to position speakers for best sound. Supports up to 8 pounds. For wall or ceiling mounting. Includes hardware. Black #40-2087, White #40-2088

Metal wall brackets

Great for surround speakers. Each bracket can support up to 50 pounds. #40-150

Speaker selectors

4-way speaker selector. For up to 4 pairs. Rated 100 watts/channel. Accepts up to 14-gauge wire. #40-244

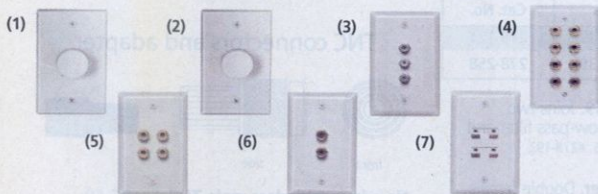

3-way speaker selector. Controls up to 3 pairs of speakers. Rated 50 watts per channel. #40-240

2-way speaker selector. For two pairs of stereo speakers. Select one pair or both. Mounting tabs. #40-132

Home theater wall plates

Great for custom installations with in-wall wiring

Feature gold-plated binding posts to assure reliable connections. All fit standard single-outlet electrical wall box.

- (1) **100-watt in-wall stereo volume control.** Ideal for multiroom systems. 10-step rotary control. #40-987
- (2) **In-wall mono volume control.** 10-step rotary control. #40-993
- (3) **Audio/video wall plate.** Three gold-plated, color-coded RCA jacks. #40-990
- (4) **8-terminal speaker wall plate.** For up to 4 pairs of speakers. Accepts up to 14-gauge wire or banana plugs. Ideal for use with RadioShack Megacable. #40-992
- (5) **4-terminal wall plate.** For up to 2 pairs of speakers. #40-983
- (6) **2-terminal wall plate.** For 1 pair of speakers. #40-982
- (7) **Speaker wall plate with 4 pushbutton terminals.** For 20 to 14-gauge wire. #40-988

Put yourself in a sweet spot—add our mounts and stands to home theater audio

RadioShack speaker mounts and stands are a perfect match for our home theater in a box systems, but they also enhance any home audio system. Our mounts give you the freedom to put speakers almost anywhere on walls or ceilings. Plus, our adjustable stands let you raise mini speakers up to ear level, where you will hear them best.

Mini speaker mounts and stands

Universal wall and ceiling mounting kit

OmniMount 10.0 Series. Virtually invisible mounts let you put speakers almost anywhere on walls or ceilings. Omnidirectional design lets you position the sound precisely. Holds speakers up to 10 pounds. Includes hardware, easy instructions. Black #40-2096, White #40-2097

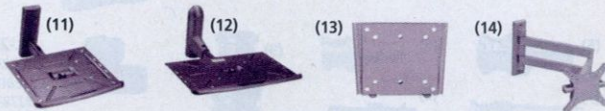

(8) Mini speaker wall mount. Fits most Bose speakers, as well as many other popular brands. Holds up to 2½ pounds. Includes mounting hardware. Black #40-2100, Gray #40-2101

(9) 5-pack of mini speaker mounts. (Same as above.) Five mounts let you put two front satellite speakers, a center-channel and two rear satellites almost anywhere! Perfect complement to our home theater in a box systems! Gray #40-2102

(10) HTS2 satellite speaker stands. Includes adjustable mounting plate for larger speakers. Height adjustable from 31-48 inches. Conceals speaker wires. #40-2106

Satellite speaker stands. Perfect for home theater in a box speakers or satellite-sized speakers. Stands adjust from 30-40". Designed to help conceal unsightly speaker wires. Low-profile styling will fit in with almost any decor. #40-2105

TV wall and ceiling mounts

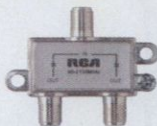

(11) Small TV wall/ceiling mount. Great for a bedroom, kitchen or office waiting room. Holds 9-13" TVs. Supports up to 88 pounds. Includes cable management system. #16-3710

(12) 19-27" TV wall/ceiling mount. Ideal for home or office. Durable, high-grade construction supports up to 132 pounds. Cable management. #16-3711

(13) LCD TV fixed wall mount. Slide-together quick-mount kit safely and easily mounts an LCD TV to a wall. For 10-30" screens. Holds up to 40 lbs. #16-3712

(14) LCD TV flexible wall mount. Cantilever design and arm extension give you maximum flexibility for adjusting and viewing your LCD TV. High-grade construction. For 10-30" screens. Holds up to 35 lbs. #16-3713

Splitter, diplexer and in-line amplifier

RCA 2-way satellite splitter. Use to combine or separate satellite and antenna TV signals. 40-2050MHz. #16-2578

RCA 4-way satellite splitter. #16-2579

Professional satellite-TV diplexer splitter/combiner. Combines signals from your satellite dish and a TV antenna so only one coaxial cable is needed to deliver them to your satellite receiver. Use a second diplexer at the receiver for hookup to the appropriate input jacks (satellite or TV antenna). #16-2586

In-line signal amplifier. Recommended when your installation requires cable run longer than 100 feet between satellite dish and antenna. 13dB gain. 950-2050MHz. #16-1156

Multiswitches for DIRECTV® systems

Powered multiswitch. For "whole house" systems with up to four satellite receivers. Allows independent selection of all satellite and antenna TV channels at each receiver. #16-2584

Passive multiswitch. Allows both satellite and outdoor antenna signals to travel down a single coaxial cable to be distributed to up to four receivers. #16-2577

Deluxe 8-way multiswitch with passive UHF/VHF. For "whole house" systems with up to eight satellite receivers. Allows independent selection of all satellite and antenna TV channels at each receiver. Wideband outputs. Includes wall-plug power supply. #930-0827

Portable/temporary dish and accessories

NEW Portable 18" satellite dish antenna. Perfect for camping, fishing trips, tailgate parties. It's also an excellent alternative when a dish antenna can't be installed permanently. Lightweight and easy to set up. Base has a built-in level and compass for rapid positioning. Includes 25 feet of cable that stores in the base. #930-1002

NEW Carrying case for portable dish antenna. Padded nylon. Protects the 18" portable dish for travel and storage. #930-1003

NEW Satellite tripod. Complete kit to get your satellite system up and running quickly and easily. Includes tripod with carrying case, compass, stakes and level. #930-1001

Dish aiming made fast and easy

NEW Satellite dish alignment compass. Use the local ZIP code to obtain the azimuth setting from the satellite receiver. Then, aim the dish in the direction indicated by the compass. Easy-to-follow alignment instructions printed right on the compass. #930-0999

NEW Satellite finder. The fast, accurate way to aim a satellite dish antenna. Just temporarily install the finder between the coax to the receiver and the dish. A meter and audio tone tell you when the dish is correctly positioned. #930-1000

RCA® dishes for DIRECTV

(1) 18" dish with one dual LNB. #16-2608

(2) **NEW Multisatellite dish.** 18x20". With three LNBs and 5x4 multiswitch. #16-2610

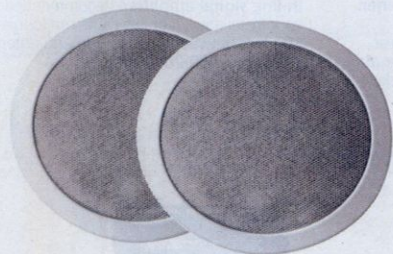

LNBs for DIRECTV

Dual LNB. For DIRECTV multiple satellite receivers. #16-2529
Satellite C LNB. Receive local channels in select markets. #16-2525

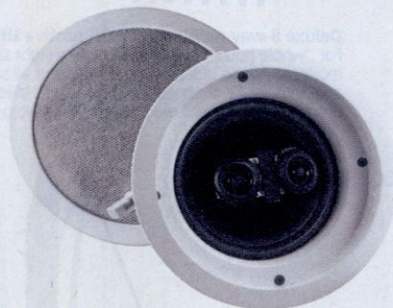

Enjoy more space, a clean installation and well-placed sound

In-wall and ceiling-mount speakers, once found only in professional PA installations, are great for homes, too! For a custom home theater installation or whole-house speaker network, our affordable flush-mount speakers deliver superb sound. These great-sounding speakers are easy to install, and can be painted to match any decor.

NEW 2-way ceiling speaker with 5 1/4" woofer

Polypropylene cone woofer for full-bodied bass. Ferrofluid-filled 1" polycarbonate dome tweeter delivers clean, clear highs. 38-20,000Hz response. Handles up to 40 watts. Quick-install wing-type mounting system, hardware included. Requires 2 1/4" mounting depth. #40-4096

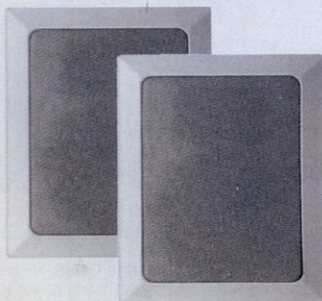

NEW Dual-tweeter, 6 1/2" stereo ceiling-mount speaker

Angled dual-tweeter provides stereo sound from one speaker. Great for whole-house intercom/stereo systems. 6 1/2" dual-voice coil polypropylene woofer. 38-20,000Hz. Handles up to 80 watts. Easy-to-install wing-type mounting system, hardware included. Requires 2 1/4" mounting depth. #40-4097

NEW 2-way in-wall speaker with 5 1/4" woofer

Polypropylene cone woofer for tight bass. 1" ferrofluid-filled soft dome tweeter delivers clear highs. Handles up to 80 watts. 35-22,000Hz response. Easy-to-install wing-type mounting system, hardware included. Requires 2 1/4" mounting depth. #40-4098

NEW 2-way in-wall speaker with 6 1/2" woofer

Delivers solid, accurate bass. 1" ferrofluid-filled soft dome tweeter provides clean, true highs. Handles up to 100 watts. 35-22,000Hz frequency response. Easy-to-install wing-type mounting system, hardware included. Requires 3" mounting depth. #40-4099

Upgrade your speakers or build a custom system

It's easy with these high-performance Pioneer speakers from RadioShack. Speakers come in all shapes and sizes, and Pioneer has got them all covered from 15" to 6½" woofers, several midranges and tweeters from ¾" to 3". Plus, with a trusted name like Pioneer, expect the latest technologies in speaker materials and design!

Audiophiles and do-it-yourselfers: Check out RadioShack.com when you need to replace or upgrade speakers in radios, TVs, PCs, guitar amps, PA systems, home and car stereos. Our enclosure-ready drivers are great for custom speakers for home theater, too.

(1) **NEW Pro Shure highball dynamic microphones deliver natural response**

(1) Tailored 70-15,000Hz frequency response engineered for vocal applications. Provides smooth true-to-life sound that speakers and karaoke performers will appreciate. Cardioid pickup pattern helps cut feedback and background noise. Handles extreme volume levels without distortion. On/off switch. 15-ft. cord with XLR connectors. #33-3048

Same features as above except with 60-15,000Hz response and specially designed for lead and back-up vocals. #33-3058

(2) **Shure instrument microphone.** Tailored frequency response 50Hz-15KHz is tuned specifically for instrument applications (guitar amps/brass/saxophone). Cardioid pickup pattern helps cut feedback noise in high-volume settings. On/off switch. Includes 15-ft. cable with XLR to XLR connectors. #33-3057

(3) **Pro unidirectional dynamic.** A superb mic for vocalists and announcers. Features smooth 50-16,000Hz response and nonslip body for a sure grip even in humid conditions. Has wire-mesh windscreen, on/off switch. 16-foot cable with XLR plug connection to mic and 1/4" plug at other end. **RSSP** #33-3001

(4) **Unidirectional dynamic.** Especially suited for vocal use. Rugged die-cast zinc body is built to last. 100-10,000Hz response. Wire-mesh windscreen, on/off switch. 20-foot cable with XLR mic plug, 1/4" plug at other end. Includes mic holder. **RSSP** #33-3004

(5) **Unidirectional dynamic.** Ideal for stage use—the cardioid pickup pattern reduces annoying feedback and unwanted background noise. 100-14,000Hz response. On/off switch. 16-ft. cable with XLR mic plug, 1/4" plug at the other end. **RSSP** #33-3002

(6) **Unidirectional dynamic.** Rugged mic has a die-cast zinc body, 50-15,000Hz frequency response, and single-direction pickup pattern to help reduce feedback squeals. On/off switch. Approximately 7 1/2" long. Attached 13-ft. cable with 1/4" plug at other end. Includes mic stand adapter. **RSSP** #33-3024

(7) **Dynamic unidirectional mic.** Perfect choice for on-stage vocals. Single-direction pickup helps cut feedback and background noise. 80-14,000Hz. 20-ft. cable with 1/4" plug. **RSSP** #33-3018

(8) **Dynamic omnidirectional mic.** General-purpose mic is sensitive to sound from all directions—useful for recording meetings, a group of vocalists or musicians. On/off switch. 100-12,000Hz response. 6-ft. cable, 1/4" plug. Includes stand clamp. **RSSP** #33-3030

(9) **Unidirectional dynamic.** High-quality all-purpose microphone—an excellent value. Metal grille. 60-16,000Hz response. 12-ft. cable with 1/4" plug. Includes swivel mic holder. #33-3021

(10) **Microphone for portable cassette recorder.** Frequency response of 100-10,000Hz. 6 1/2-foot cord with 1/4" audio plug, 1/2" remote control plug. #33-2001

(11) **Mic for microcassette recorders.** 3-ft. cord with a 1/2" mono plug and 1/4" plug adapter. 100-10,000Hz. 1/4" plug adapter allows use with regular-size recorder. #33-3019

(12) **Headset microphone with gooseneck boom.** Great for stage, PA or DJ use. Just plug into your amplifier for hands-free convenience or add the 900MHz transmitter and receiver (#32-1252 and #32-1250 at right) to eliminate trailing wires. Unidirectional microphone provides 100-12,000Hz frequency response. Adjustable headband. Includes on/off switch with belt clip, power supply with 16-ft. cord, gold-plated 1/4" plug and 1/4" adapter. **RSSP** #33-3012

(13) **Hands-free tie-clip electret mic.** 70-16,000Hz response. 1000 ohms. 3 1/2-foot cord with 1/4" plug. On/off switch. With battery. #33-3013

(14) **Omnidirectional conference microphone.** Provides high-quality 360° pickup—ideal for a business conference room. 30-18,000Hz response. Battery/control box with on/off switch. 20-ft. cable with 1/4" plug. **RSSP** #33-3022

(15) **Mic with chime.** For PA use in hospitals, supermarkets, department stores, schools and other public buildings. Wide platform base allows for convenient placement. Unidirectional condenser mic with 100-10,000Hz frequency response. Three chime tones. **RSSP** #33-3050

Wireless FM microphones and accessories

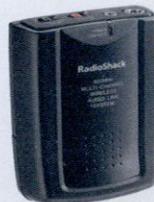

Hands-free wireless mic system

Crystal-controlled 49MHz system delivers excellent clarity and range up to 200 feet. The receiver has an output level control plus mic and line-level outputs for connection to virtually any amplifier or recorder. Tie-clip mic connects to a compact transmitter with a standby/talk switch and belt clip. Requires 2 "AA" batteries. Receiver: UL listed AC (or add DC adapter #270-1558/M, extra) **RSSP** #32-1221

NEW 8-channel, 900MHz wireless microphone

This rugged, high-quality microphone provides great sound and range up to 200 feet. It can be set to any one of eight 900MHz frequencies—perfect for use with our 900MHz wireless receiver (#32-1250, below). Cardioid pickup pattern cuts background noise and feedback. Features include flashing LED low-battery indicator, on/off and mute/talk switches. Approx. 2 1/4" diameter, 9 1/2" long. Requires 9V battery. **RSSP** #32-1251

NEW 8-channel, 900MHz wireless transmitter

Clip it to your belt, plug in a mic or instrument, and you're ready to speak or perform free from wires. Great for use with our 900MHz wireless receiver (#32-1250, below), it can be set to any one of eight frequencies. Provides range up to 150 feet. Features compander noise-reduction system, separate mic and line input jacks, and LED low-battery indicator. Approx. 3 1/2 x 2 x 1". Requires 9V battery. **RSSP** #32-1252

NEW 900MHz wireless receiver

The companion receiver for our 900MHz wireless mic and wireless transmitter above is equipped with both XLR and unbalanced outputs—connects to virtually any PA amp, audio mixer or recorder. (Requires cable with appropriate plugs, sold separately.) It can be set to any one of eight 900MHz frequencies for use in a system with up to 8 wireless mics or instruments. (Separate receiver required for each mic or instrument.) Bass, treble and volume controls. Approx. 2 1/2 x 8 1/2 x 5 1/2". Includes UL listed AC adapter. **RSSP** #32-1250

Carry Your Entertainment Safely

Don't take unnecessary chances! Secure your valuable audio equipment and media in our cases when you travel. Our carry bags and cases are durable and specially designed to protect the surfaces of your discs, at home or on the go.

CD-to-cassette player adapter

The most affordable way to enjoy CD listening in your car. Plugs into your portable CD player's stereo headphone jack and loads like a cassette tape to deliver superb digital audio through your vehicle's stereo system. No installation or special wiring required. #12-1999

iRock!™ wireless music adapter

Transmit music or other audio from your player directly to your home or car FM radio—with no hassle, no wires—with the 300W wireless music adapter! Stereo 1/4" plug goes into any audio output source (MP3, CD, cassette player, etc.). Select any of four FM frequencies to transmit on (88.1, 88.3, 88.5, 88.7MHz). Tune your car, home or portable FM radio to the same frequency. Hear your favorite music in full stereo sound! Compact size: 2x3x1". Range 10-30 feet, depending on quality of FM radio receiver. Includes flexible 7" antenna. Requires 2 "AAA" batteries. #12-2052

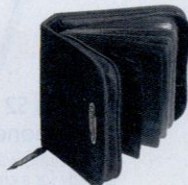

Zippered 32-CD wallet

Holds 32 CDs, DVDs or compact discs. There's enough space to carry most portable CD players, too. Includes convenient top handle and front zipper compartment to store earphones. Rugged, water-resistant padded nylon cover helps keep out dust and moisture. Orange/black #42-273, Silver/black #42-274

Store even more with 64-CD wallet

Padded zipper pocket has enough room to hold CD player, headphones and accessories, too. Nonstick sleeves help prevent scratches on CDs. Water-resistant. Vertical sleeve with designer cutout. Top handle. Padded, heavy-duty nylon for added protection. #42-276

32-CD wallet

Holds CDs, DVDs and CD-ROMs with accompanying booklet with room for most portable CD players, too. Nonstick sleeves help protect against scratches and excessive temperatures. Zippered cover seals out dust. Padded, heavy-duty nylon adds protection. #42-271

208-CD album-style carrying case

Case holds CDs, DVDs or CD-ROMs and booklets in protective sheets. Lots of room for several portable CD players and all the accessories. Rugged, water-resistant padded nylon cover helps keep out dust. #42-278

Zippered 96-CD wallet

Easy way to take your disc collection along. Holds CDs, DVDs, CD-ROMs, plus accompanying booklet with space for most portable CD players. Nonstick sleeves help protect against scratches and temperature extremes. Water-resistant zippered cover helps seal out dust and moisture. Padded, heavy-duty nylon for added protection. #42-277

12-CD sun visor travel case

Perfect traveling companion for music lovers! Low-profile case wraps around the visor to put your favorite music at your fingertips—no fumbling with jewel boxes or cases lying on the seat. Elastic band holds pen. #42-275

Lightweight CD player travel case

Water-resistant zippered case holds most portable CD players, plus stores 8 CDs in their cases in a separate inner pocket. Extra space for batteries or other accessories. With strap and belt loops. #42-272

RadioShack is your headquarters for headphones.

Lightweight stereo headphones

NEW Stereo headphones with titanium diaphragms

RadioShack PRO 35A titanium headphones deliver rich, clear sound and ultra-wide 15-25,000Hz response. Features include convenient in-line volume control and comfortable, easy-to-adjust headband. 4-ft. cord, gold-plated $\frac{1}{8}$ " plug. **RSSP** #33-1222

SONY

Fold-up S2 Sports™ headphones for workouts

Lightweight, water-resistant Sony® headset is ready for a challenge. Unique moisture-guard mechanism helps direct sweat away from your ears as you exercise. Powerful neodymium magnets and Sony Acoustic Twin Turbo™ design team up for rich bass and clean highs. 4-ft. cord, gold-plated $\frac{1}{8}$ " plug. **RSSP** #33-1206

KOSS

NEW Water-resistant headphones are ideal for outdoor activities

If you're into workouts, check out this behind-the-head headset by one of the world's most respected makers. Efficient side-firing earbuds give you full 40-20,000Hz response for hours of comfortable listening. 4-ft. cord, gold-plated $\frac{1}{8}$ " plug. #33-1220

Wraparound stereo headset includes three earcup colors

Swap out the blue, orange or green earcups to match your style. High-performance RadioShack headphones fold to fit pocket or purse and include a carry pouch. 20-20,000Hz. 4-ft. cord, gold-plated $\frac{1}{8}$ " L-plug. #33-1178

Wraparound stereo headphones with in-line volume control

RadioShack headphones rest comfortably on the back of your head. Stereo/mono switch for use with pocket TVs and portable stereos. 20-20,000Hz. 3 $\frac{1}{2}$ -ft. cord, gold-plated $\frac{1}{8}$ " L-plug. #33-1177

Great selection! RadioShack has the headset you want

Light headphones for TV or stereo portable

In-line volume control with a stereo/mono switch so you can listen to any TV, pocket radio or stereo portable. 50-20,000Hz response. Long 16-foot cord, gold-plated $\frac{1}{8}$ " plug. #33-1162

NEW Fold-up headphones with true electronic noise canceling

RadioShack headset uses an active powered system to subtract background noise electronically, reducing it up to 15dB. Includes airline plug adapter and travel pouch. 4-ft. cord, gold-plated $\frac{1}{8}$ " plug. Add "AAA" battery. **RSSP** #33-1218

Hear your scanner over the roar of the engines and crowd—comfortable earcups conform to your ears for excellent noise isolation. Adjustable headband. Heavy-duty coiled cord, 100-20,000Hz frequency response, volume control. $\frac{1}{8}$ " gold-plated mono plug. **RSSP** #33-1198

Stereo headphones with volume control

Easy-to-adjust rotary volume control. Adjustable headband. 20-20,000Hz. 6 $\frac{1}{2}$ -ft. cord, gold-plated $\frac{1}{8}$ " L-plug. #33-1116

Engineered like headphones worn by pit crews—passive isolation system and sealed earcups provide up to 20dB of noise reduction—helps you hear your scanner over motor and crowd noise. Comfortable fluid-filled ear cushions, behind-the-head steel band with adjustable strap. Fiber-reinforced 8-ft. coiled cord with gold-plated $\frac{1}{8}$ " mono plug. 40-20,000Hz response. **RSSP** #33-1158

Economy headset is great for workouts

Lightweight RadioShack stereo headset with tough, rubberized headband and side-firing drivers. Wide 20-20,000Hz frequency response. 4-ft. cord, gold-plated $\frac{1}{8}$ " plug. #33-1131

Good sound at a budget price

Adjustable, lightweight RadioShack headphones with 30-20,000Hz response, 4-ft. cord and gold-plated $\frac{1}{8}$ " L-style plug. #33-1160

Computer mic/headset

Light and comfortable RadioShack headset with replaceable leather earcups and omnidirectional condenser mic. 30-15,000Hz response. 8-ft. soft cable with two $\frac{1}{8}$ " gold-plated plugs. **RSSP** #33-1187

NEW Koss® PRO4AA stereo headphones

Just like the ones used by studio and broadcast professionals for 50 years! Titanium-coated diaphragms reduce mechanical distortion and deliver improved high-frequency response for clearer, cleaner sound reproduction. 10-25,000Hz frequency response. Closed Pneumalite™ ear cushions retain

bass frequencies and isolate the listener from ambient noise. **RSSP** #33-1217

Full-size titanium performance stereo headphones

Soft foam-filled cushions give maximum isolation from outside sounds and great deep bass performance. Titanium diaphragms for the full and accurate sound reproduction you crave. Wide-range 20-20,000Hz frequency response.

Adjustable headband allows a comfortable, secure fit. 8-foot cord with gold-plated $\frac{1}{4}$ " right-angle plug. **RSSP** #33-1182

Extreme fold-up headphones with volume control

Ideal for active use. Large, closed-type ear cushions help you hear the rich bass sound.

Super-lightweight design with rugged twist-style headband. Extra-wide-range 18-20,000Hz frequency response. Easy-to-reach volume controls. 8-foot cord, $\frac{1}{4}$ " gold-plated plug. **RSSP** #33-1169

Full-size headphones with volume control

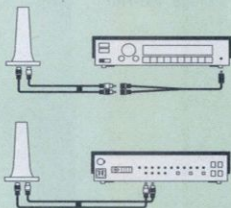

Separate left and right rotary volume controls on headset let you adjust individual volume levels. Full-size closed-cup ear cushions help seal out outside sounds. Wide 20-20,000Hz frequency response. 9 $\frac{1}{2}$ -foot coiled cord and $\frac{1}{4}$ " gold-plated plug. #33-1176

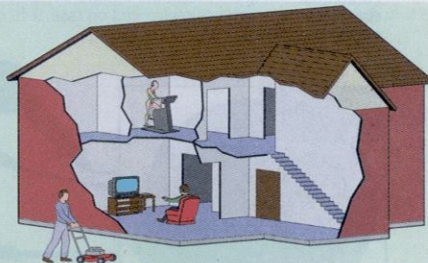

Stereo headphones with fold-up design and retractable cord

A neat design! Comfortable, lightweight stereo headphones fold up compactly and the 3-foot cord retracts for easy, neat storage after each use. Wide 20-20,000Hz frequency response. Cushioned ear pads, $\frac{1}{4}$ " gold-plated stereo plug. **RSSP** #33-1173

Don't get tied down—go wireless for total listening freedom!

- **Great sound, no wires!** With a range up to 150 feet, 900MHz headphones let you enjoy music in another room, the garage, even in the yard. Night owls can hear music without disturbing others.
- **900MHz for best sound and range.** 900MHz signals penetrate walls and floors to deliver clear stereo sound. You get longer range and less static than with infrared headphones.
- **Easy to use—works with most audio equipment.** Set up in minutes! AC-powered transmitter connects to stereo's headphone or audio-out jack. Just put on headphones, tune in, set volume and enjoy! Works with stereo, CD player and tape deck. Connect to VCR and hear TV shows at any volume without disturbing others—handy for late-night viewers.

RCA® wireless infrared headphones

Infrared system has a range of up to 25 feet. Ideal for late-night TV viewing or listening to music without disturbing others in the room. Transmitter connects to audio-out or

headphone jack on your stereo. Headphones recharge on transmitter. Includes 2 "AAA" rechargeable batteries. **RSSP** #33-1174

NEW RadioShack 49MHz wireless stereo headphones

Transmit music through walls and floors up to 100 feet away, no wires or cords to get in your way. Individual

left/right volume controls on headphones. Cushioned earpads for maximum comfort. Requires 2 "AA" batteries. **RSSP** #33-1219

Self-adjusting RadioShack 900MHz wireless headphones

Move to the music—without wires! Compander noise reduction and PLL circuitry for clear sound up to 150 feet away. Auto level control helps prevent annoying peaks in

volume. Wide 80-20,000Hz response. Headphones require 3 "AAA" rechargeable or alkaline batteries. **RSSP** #33-1196

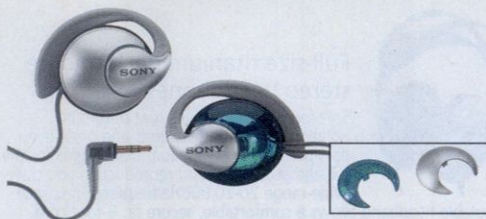

RCA 900MHz wireless headphones

Work through walls, floors, ceilings—up to 125 feet away. Listen privately to TV, VCR or home stereo sound anywhere in your house, even in your backyard. Volume control on headphones. Connects easily to audio-out or headphone jack. Includes $\frac{1}{4}$ " plug with $\frac{1}{4}$ " plug adapter, hookup cable, 2 "AA" rechargeable batteries and UL listed AC adapter. **RSSP** #33-1164

RCA 900MHz lightweight fold-up wireless headphones

Ultra-compact transmitter saves space, too. Hear up to 150 feet away. Turn up the volume late at night without disturbing others. Adjustable headband and earcups provide long-wearing comfort. With $\frac{1}{4}$ " stereo plug adapter, DC power adapter, Y cable adapter and two rechargeable "AAA" Ni-CD batteries. **RSSP** #33-1184

Sony® clip-on stereo headphones

Innovative spring-action earpiece features switchable color caps to match your style. 18-24,000Hz response. Neodymium magnets, gold-plated $\frac{1}{8}$ " L-style plug. **RSSP** #33-1202

Retractable stereo in-ear buds with rotary volume control

Just slide a switch and cord automatically retracts. Wide 20-20,000Hz frequency response ensures outstanding clarity. Side-mounted volume control on case. 3-ft. cord with gold-plated $\frac{1}{8}$ " L-style plug. #33-1129

In-ear stereo buds with in-line volume control

Our best in-ear stereo buds deliver wide 16-22,000Hz response. Include extra earpads and wind-up carry case. 4-ft. cord with gold-plated $\frac{1}{8}$ " L-style plug. #33-1991

In-ear stereo earbuds with handy wind-up case

Slip 'em into your pocket for use anywhere. 20-20,000Hz response. 3 $\frac{1}{4}$ -ft. cord with gold-plated $\frac{1}{8}$ " L-style plug. #33-1170

Mute switch

Noise-reducing in-ear stereo earphones

Enjoy superb 10-20,000Hz frequency response, even in high-noise areas. Includes two pairs of earpads—one hexagon, one cone-shaped—for a custom-type fit. On-cord mute switch. 4-ft. cord, gold-plated $\frac{1}{8}$ " L-style plug. Includes carry pouch. #33-1167

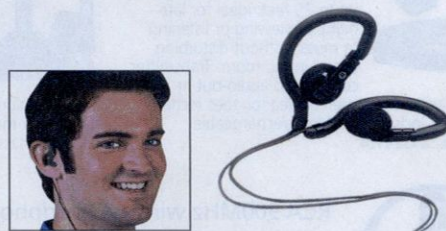

In-ear stereo headphones with silicon pads for a comfortable fit

Soft silicon rubber pads allow a custom-style fit your ears will love. Wide 20-20,000Hz frequency response. 4-foot cord with gold-plated $\frac{1}{8}$ " L-style plug. Winding case for easy storage. #33-1161

Sony vertical stereo earphones

Keep an ear on your music—and what's going on around you. Soft hooks fit comfortably over your ears. 18-22,000Hz frequency response. 43" cord with gold-plated $\frac{1}{8}$ " L-style plug. #33-1204

Soft rubber hook-style earphones

No headband needed. Lightweight, comfortable hooks keep them in place for working out, biking and other activities. In-line volume control. Full 20-20,000Hz response. 4 $\frac{1}{2}$ -ft. cord with gold-plated $\frac{1}{8}$ " L-style plug. #33-1106

Mono earphones

NEW Earphone also includes 3/32" plug adapter

Lightweight, flexible earclip for maximum comfort. Includes 3/32" L-style plug and 3/32" adapter for use with mono cassette recorders and radios. 3 1/4-foot cord. #33-179

NEW Earphone with extra-long 10-ft. cord

Use with pocket radios and TVs, recorders, more. 1/8" plug, 3/32" adapter. Flexible earclip for comfortable fit. #33-180

Earphone with 1/8" plug

Ideal for pocket TVs. 3 1/4-ft. cord. L-style plug. #33-1172

Pillow speakers

Standard pillow speaker

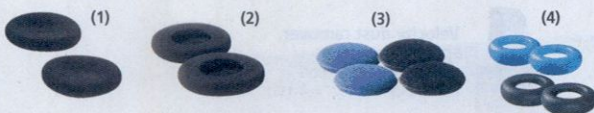

4-ft. cord, monaural 1/8" plug. Add #274-374 or #274-363 plug adapter to use with stereo equipment. #33-206

Pillow speaker with volume control

Fits comfortably under the pillow so you can enjoy TV or radio without disturbing others. Side-mounted volume control. 6-ft. cord with right-angle 1/8" mono plug. #33-209

Replacement earpads

(1) **NEW** Earpads for lightweight stereo headsets. Pack of two. #33-380
Earpads for mini stereo headsets. Pack of two (not shown). #33-375

(2) Earpads for RadioShack wireless earphones and other larger headphones. Pack of two. #33-379

(3) Fit most micros. Pack of four. #33-376

(4) Silicon rubber pads for in-ear headphones. Pack of four. #33-1994

Volume booster

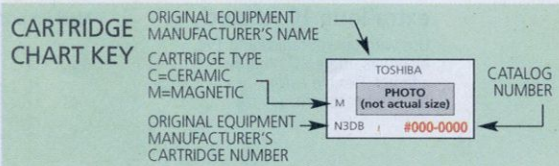

Share the sound with two others

Delivers high-fidelity stereo sound to one, two or three channels. Simply plug in headphones and listen to music, talk radio, taped books on cassette, video games or a PC with two others—ideal when traveling by plane, car, bus or train. 1/8" plug and three 1/4" jacks. Requires 2 "AA" batteries. #33-1109

How to Select a Phono Cartridge or Stylus

A new cartridge or stylus (needle) can bring out the best from vinyl records and prolong their life. Selecting a replacement can be tricky, so we strongly suggest that you ask a RadioShack sales associate for help.

1. You will need the name of the manufacturer of the turntable, record player or stereo system. You will also need the cartridge or stylus model number.
2. Cartridges can be divided into two major categories—magnetic and ceramic. They are NOT interchangeable. Magnetic cartridges are commonly used in more expensive turntables and stereo systems. Ceramic cartridges are found in less expensive equipment. The cartridges shown below and on the next page include a stylus (needle). You can also purchase a stylus separately for use in an existing cartridge.
3. If the manufacturer's model number is not known, bring in your existing stylus or cartridge and we'll help you find a replacement. Ask a sales associate for details.

Diamond replacement phono styli (needles)

R3X diamond replacement stylus. Fits R25XT (#970-1289), M71 and M75ECS series. #970-1293

RS3P. For RXP3, M92E and M104E-series. #970-1290

RS-98. Tetrad cartridge/stylus 51-54D, 61-64D, A1-A3, B-1, B-4, T5HD, 20HD. #970-1207

RS-166. For BSR cartridge or stylus no. SC7H, SC8M, ST-16, ST-17, ST-21. #970-1079

RS-127. Tetrad cartridge/stylus 40-44D, 20-24D, C-01/2/3, T3, 30MD. #970-1216

Turntable and record accessories to help maintain the best sound

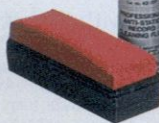

Magnetic cartridge stereo preamp. Allows a turntable with magnetic cartridge to be connected to ceramic phono or aux. input of an amplifier, stereo system or boombox. #970-1018

Pro record cleaner. Keep LPs sounding great! Brush, 2-oz. bottle. #42-117

Velocity dust remover spray. Safely cleans delicate surfaces. Non-flammable. 10 oz. #64-4351

Jumbo self-stick feet. End shelf scratches from audio gear. Help isolate turntable from vibration. #64-2342

RadioShack has the cellular & PCS accessories you need.

When it comes to cellular and PCS phone batteries—no one compares to RadioShack

We carry a complete line of the very latest standard, slim and extended batteries for the most popular brands like Motorola, Nokia, Kyocera, LG, Samsung, Audiovox, Sony-Ericsson and Sanyo. Whether you're looking for a replacement for an old battery or a backup for business trips and emergencies, we have what you need.

Nickel-Metal Hydride (Ni-MH) has more than twice the power of regular Ni-CD batteries. It's perfect for power-hungry phones like camera phones, organizer phones and 3G phones with games, animated ringers and high-resolution displays.

Lithium-ion (Li-ion) extended battery is the latest and greatest development on the technological ladder. Li-ion delivers up to 3 times longer performance time than most alkalines and is lighter than most nickel-based batteries. Plus, it works with both 2G and 3G phones. Li-ion is ideal when you need extra time between charges without sacrificing functions.

NOKIA

SANYO

Did Ya Know?

RadioShack has knowledgeable people right in your neighborhood. We have over 7000 stores and dealers nationwide. And our friendly store associates are Verizon Wireless and Sprint PCS® certified.

A custom-fit, glove-leather case will help keep your phone safe and sound

Protect your wireless phone with one of our soft, durable, 100% lambskin leather cases

Each is custom-made for a perfect fit so you can safeguard your phone without covering buttons or plugs. Plus, our cases are designed to accommodate batteries from slim to extended. They also feature a belt clip to keep your phone securely at your side. Rolled edges and 100% nylon stitching also ensure long-lasting durability.

Rest assured—we rigorously test each case to guarantee long life without tearing, cracking or bleeding of color

We pass every single leather case through an abrasion machine 1000 times to ensure the leather won't tear or break. We also stretch the elastic 2000 times and watch it return to its original shape every time. Why do we go to such extremes when we test our cases? Because they are OUR cases. The RadioShack name means quality and we have the test results to prove it!

Get the most from your cellular or PCS phone

Car power adapter

Our redesigned car power adapters have some great new features. Like a three-stage indicator light that lets you know at a glance when your battery is fully charged. The light goes from red to yellow to green as the battery is charged. Plus, our car power adapters now have a limited lifetime warranty—proving they're among the best money can buy. And you still get the same reliable protection and durability you've come to depend on. Our adapters are fuseless, so there's no fuse to blow. The circuit resets anytime a voltage spike occurs. The adapter continues working and you can continue talking. The soft-grip texture has a nice feel and helps you keep hold of the adapter.

Too busy to stop what you're doing and talk? Go hands free and do both!

RadioShack has a great selection of headsets for all brands of wireless phones. We've got the style, fit and features from some of the biggest names in the game. Choose from Plantronics®, JABRA®, or our own RadioShack brand. We have a large variety, so you can select the headset that's right for you. Any way you go, you'll get a comfortable headset for hands-free conversations. Get superior voice and sound quality no matter where you are—in the car, around the house or outside. And if your lifestyle takes you on the road, a headset will help you keep two hands on the wheel. ♦ No matter what kind of phone you have or where you bought it, RadioShack has the headsets you want.

Did Ya Know?

RadioShack has even more accessories to choose from—holsters, clips, AC chargers, speakerphone kits, universal mounts and grips.

Computer Accessories

From basic connectors to the latest in media and networking gear, RadioShack has everything you need to get the most from your computer.

Mice, keyboards, i-pens, USB hubs and cables in various lengths and connections. Media for CDs, DVDs, Zips and floppies.

USB, parallel, serial and PS/2 cables in popular lengths. Adapter cables—like serial to USB—to bridge the gap between technologies. Networking connectors and cables, plus many more accessories to help your computers work smarter.
